USE OF AI-BASED WRITING TOOLS

This is specifically about ChatGPT but applies to using any artificial intelligence technology in this class. ChatGPT is an AI-based language model that can generate human-like text and is available to students in this course. However, its use is limited to idea generation only. The purpose of this section is to outline the guidelines for using ChatGPT in this course and to specify the restrictions on its use.

- Students may use ChatGPT or other AI-based language models to assist with generating ideas or writing prompts, but the final product must be their own original work. Students must recognize the importance of generating their ideas and thoughts to enhance their critical thinking, problem-solving, and decision-making skills. Therefore, the use of ChatGPT should be seen as a supportive tool, rather than a replacement for students' ideas and efforts.
- Students are not permitted to use ChatGPT or other AI-based language models to complete assignments or exams. Any use of ChatGPT or other AI-based language models for such purposes will be considered academic dishonesty and will result in appropriate action being taken, in line with the College's academic integrity policies.
- If using ChatGPT or other AI-based language models to generate ideas, students must cite the use of ChatGPT or other AI-based language models in their work, following the style guidelines for the course.
- Students are responsible for understanding the limitations and potential biases of ChatGPT and other AI-based language models and for critically evaluating their output.
- The use of ChatGPT or other AI-based language models is not a substitute for participating in class discussions or completing course readings.
