## USE OF GENERATIVE ARTIFICIAL INTELLIGENCE (GENAI) TOOLS

---

This is specifically about ChatGPT but applies to using any artificial intelligence technology in this class. ChatGPT is an AI-based language model that can generate human-like text and is available to students in this course. However, its use is limited to idea generation only. The purpose of this section is to outline the guidelines for using ChatGPT in this course and to specify the restrictions on its use.

- Students may use ChatGPT or other AI-based language models to assist with generating ideas or writing prompts, but the final product must be their own original work. It is essential that students recognize the importance of generating their ideas and thoughts to enhance their critical thinking, problem-solving, and decision-making skills. Therefore, the use of ChatGPT should be seen as a supportive tool, rather than a replacement for students' ideas and efforts.
- Students are not permitted to use ChatGPT or other AI-based language models to complete assignments or exams. Any use of ChatGPT or other AI-based language models for such purposes will be considered academic dishonesty and will result in appropriate action being taken, in line with the College's academic integrity policies.
- If using ChatGPT or other AI-based language models to generate ideas, students must cite the use of ChatGPT or other AI-based language models in their work, following the style guidelines for the course.
- Students are responsible for understanding the limitations and potential biases of ChatGPT and other AI-based language models and for critically evaluating their output.
- The use of ChatGPT or other AI-based language models is not a substitute for participating in class discussions or completing course readings.

### Attendance and Teamwork

It is critical that students make a commitment to attend **ALL** classes to enable effective teamwork. The use of cameras and microphones will be required. If you are unable to meet this requirement contact your instructor to discuss options.

### Assignments Overview

Working effectively in teams is an essential skill and a critical part of this course. There are two major assignments involving teamwork, which together are worth 35% of the final grade.

#### Team Project – Case Analysis (15%)

In teams of 4-5, students will work collaboratively to analyze current issues or events through an organizational behaviour (OB) lens. Using a real-life situation, students will apply OB concepts to identify contributing factors, and to explore how OB concepts could be applied to better understand or resolve the issues.

This project has three parts:

- 1) Team contract
- 2) Written report
- 3) Peer review

#### Team Project – Organizational Analysis (20%)

In teams of 4-5, students will analyze an existing organization integrating course concepts. As a team, students will conduct research on the organization and interview an employee at that organization in order to write a detailed analysis about the organization.

This project has four parts:

- 4) Team contract
- 5) Project proposal
- 6) Interview & analysis written report
- 7) Peer review

If you have a concern about a grade you have received for an evaluation, please come and see me as soon as possible. Refer to the [Grade Review and Appeals](#) policy for more information.
