## CALENDAR DESCRIPTION

---

Students will apply a number of statistical techniques used for business decision-making. They will learn to solve business problems and make related predictions using simple and multiple regressions, exponential smoothing, non-parametric statistical procedures, analysis of variance, seasonal and enumerative data, linear programming, and inventory control models.

PREREQUISITE(S): One of: C in STAT 116, C in STAT 216, C in STAT 218, C in BUS 230

## COURSE LEARNING OUTCOMES / OBJECTIVES

---

Upon successful completion of this course, students will be able to:

1. Utilize appropriate tools to support quantitative problem solving.
2. Apply the F-distribution and the concept of analysis of variance (ANOVA) to compare the means of multiple populations and make inferences about the relative variances of two populations.
3. Develop simple and multiple linear regression models for analyzing cross-sectional data.
4. Apply the chi-squared distribution and non-parametric methods to hypothesis testing and the analysis of ranked data.
5. Use and explain concepts related to statistical quality control.
6. Construct and use indices to compare data.
7. Choose appropriate time series methods and use them to forecast in-sample and out-of-sample data.

### Lecture Attendance

To get the most out of this course, students are expected to attend all classes and be on time. It is your responsibility to acquire all information given during a class missed.

### Assignments

There will be four assignments throughout the term – each worth 10% of your total grade. In general, each assignment will address a different statistical concept that requires both quantitative and qualitative problem solving.

### Review Exam

The review exam will test your understanding of the following topics: Confidence Intervals and Hypothesis Testing. Additional information regarding the review exam will be discussed in class and made available on D2L during week 4.

### Final Exam

The final exam will test your understanding of the following topics: Chi-Square Applications and Analysis of Ordinal Data. Additional information regarding the final exam will be discussed in class and made available on D2L during week 14.

**Assignment Formatting.** The School of Business uses APA style for formatting assignments and citing references. Proper citations and formatting using APA style will be required. See Camosun College (2018) Library Citation Guides retrieved from: <http://camosun.ca.libguides.com/apa7>.
