COURSE GUIDELINES & EXPECTATIONS

Hours of banter, pages of writing, and thousands of dollars of research have been devoted to answering one of the most popular and elusive questions about entrepreneurship: “What Makes a Successful Entrepreneur?”. Is it a personality trait? Can entrepreneurship be learned? Can it be taught? What kind of person does it require? Can anyone become this kind of person, or are certain people born for entrepreneurial life? This course will provide an opportunity to discuss the answers to these questions.

The second, and major, focus of this course is on developing a Business Plan. People buy products and services to solve problems and if an existing solution is working, they will resist changing. Thus, the search for new opportunities should start with people who have problems that are not being solved to their satisfaction. If an idea solves a problem better than what is currently available, but people are satisfied with the current solution, they are unlikely to switch, no matter how much better one thinks their alternative is. This is human nature! However, if the old solution is not acceptable then one should develop a clear understanding of why a group of users finds the current solution unsuitable and determine what a better solution would look like. This indicates an opportunity worth investigating.

BUS 280 is a fast-paced, demanding course, with a substantial team project to complete. However, it can also be a lot of fun. Students are expected to read the assigned material before class.

Be prepared to take part in discussions, ask questions and contribute from your experience.

AI Policy. Students are responsible for the submission of their own work, in their own words, in accordance with Camosun College’s [Academic Integrity Policy](#). Work generated by AI loses the student’s voice, relies on algorithms to create wording, doesn’t grasp theory well, over-simplifies while is unable to think critically. A paper written by AI is logistically difficult to understand and grade, flattening the student’s argument while stripping the voice or reason.

GPTZero is the most reliable AI detection tool I have found and will be used as a guideline should AI be suspected. A grade of zero will be given for the submission and you will be required to meet with me to discuss. No AI detection tool is perfect, and should AI be suspected, it is the beginning of a discussion.

Please note: Grammarly uses AI. Do not use Grammarly’s “make my work sound more academic” or any similar options. If using Grammarly, use it offline (turn off your WIFI) or use the MS Word spellchecker. Google Translate uses AI, so writing a student writing a paper in their home language and using Google to translate renders an AI generated paper, a grade of zero and a discussion with me.
