## USE OF GENERATIVE ARTIFICIAL INTELLIGENCE (GENAI) TOOLS

---

This is specifically about GenAI tools (e.g., ChatGPT, Bing Chat, etc.) but applies to using any artificial intelligence technology in this class. GenAI tools are available to students in this course. The purpose of this section is to outline the guidelines for using GenAI tools in this course and to specify the restrictions on its use.

- Students may choose to use GenAI tools to assist with understanding course concepts, summarizing lectures, or writing assistance, but the final product must be their own original work. It is essential that students recognize the importance of generating their ideas and thoughts to enhance their critical thinking, problem-solving, and decision-making skills. Therefore, the use of GenAI tools should be seen as a supportive tool, rather than a replacement for students' ideas and efforts.
- Students are responsible for understanding the limitations and potential biases of GenAI tools and for critically evaluating their output.
- Students are responsible for any output produced, and are ultimately accountable for the work they submit.
- Students must document and be transparent about their use of GenAI tools. The documentation should accompany each assignment and include what tool(s) were used, how they were used, and how the results were incorporated into the submitted work. Any content produced with the support of a GenAI tool must be cited appropriately, following APA format.
- Students are not permitted to use GenAI tools to complete quizzes or exams. Any use of GenAI tools for such purposes will be considered academic dishonesty and will result in appropriate action being taken, in line with the College's academic integrity policies.
