Guidelines for Preparing and Submitting Written Assignments

All formal written assignments for this course should be typed according to assignment specifications. When and if you use sources, your papers should use correct and complete citation format according to the guidelines set out by the relevant academic discipline. All papers should be clearly marked with your name and submitted on time, as a .pdf, .doc., or .docx file through D2L Assignments.

Late and Missing Assignments

You must submit assignments on time. That said, a reasonable explanation for a late assignment, if it is given before the due date, will be accepted. Late submissions without prior explanation will be penalized by 10%. Submissions more than one week late will be given a '0'.

Plagiarism & Cheating

Plagiarism is a serious academic offense. Please ensure you submit your own, original work, which you have written for the assignments in this class. You should review Camosun's policies on academic honesty and plagiarism, which you can find here: <https://camosun.ca/sites/default/files/2021-05/e-1.13.pdf>. If you ever have any questions about plagiarism, please let me know. I'm happy to help you develop strategies to avoid accidental plagiarism *before* you submit your assignment for marks.

Artificial Intelligence and Large Language Models

While different courses will have their own policies regarding the use of artificial intelligence (AI) and large language models (LLM), in this class you may not use such programs or tools unless explicitly given permission by your instructor to use them in specific capacities. In other words, the default is such that you may not use AI or LLM tools to draft or revise, in part or in whole, the work you submit for this course.

This guideline is here to promote the growth of your critical thinking, source vetting, and writing skills. As such, please note that the use of AI and LLM tools outside of what your instructor has specifically permitted for a specific assignment will constitute a violation of academic integrity.

That said, I am very happy to have conversations with you about AI and LLMs, their ethics, affordances, and limitations. These are exciting technologies that are here to stay, and it's important that we cultivate curiosity and critical capacities so we can use them effectively, ethically, and safely.

Additional Notes

If you encounter circumstances that you feel impede your learning in this course, or if throughout the term you discover ways I could better support your learning, please let me know. We are in this together, and I am happy to work with you to create a positive and productive learning environment.
