COURSE LEARNING OUTCOMES / OBJECTIVES

Upon completion of this course a student will be able to:

Solve three dimensional geometry problems involving points, lines, planes, vectors, vector projections, and distances.

Sketch, differentiate, and integrate vector-valued functions to find velocities, accelerations, tangents, and normals.

Differentiate functions of many variables and use chain rules to differentiate composite functions. Compute gradients, directional derivatives, and multivariable Taylor series.

Setup and evaluate multiple integrals to find areas, volumes, masses, centres of mass, and moments of inertia.

Change variables in multiple integrals to cylindrical, spherical, or general coordinates.

Compute the divergence or curl of a vector field, and find the potential function for conservative fields.

Setup and evaluate line and surface integrals.

Use Stokes theorem and the divergence theorem to evaluate line and surface integrals.

COURSE GUIDELINES & EXPECTATIONS

Homework: There will be periodic assignments (10 all together) to be completed and handed in for marking. They must be completed on the worksheets provided (not on blank paper), copies of which will

be handed out in class. While collaboration with your classmates is permitted, you must submit your *own* work and ensure you don't let collaboration turn into plagiarism. You may not post assignment questions to, or copy solutions from, "cheat" websites such as Chegg and ChatGPT.

Due dates for assignments will be posted on the course webpage, and assignments are due by the end of class on the due dates. If you are unable to hand in a hardcopy of your assignment solutions, you may scan and email me a single PDF file (not JPG images) of your assignment so long as it prints legibly and arrives by the deadline. Solutions will be posted soon after assignments are collected. As such, *late assignments will not be accepted under any circumstances*. To further accommodate situations where a student is unable to submit his or her assignment on time (e.g. due to illness), the lowest assignment mark will be dropped when computing the assignment average.

Test Absences: If you miss a test for a legitimate reason such as illness, accident or family affliction, you should notify me (by email, phone/voicemail, or in person) *as soon as possible* and *before* the test (unless circumstances reasonably prevent you from doing so) and be prepared to provide supporting documentation upon your return. There will be no "make-up" tests, but instead, in the event of an excused absence, the mark from your final exam, or relevant subset thereof, will replace your test mark.

SCHOOL OR DEPARTMENTAL INFORMATION

A&S Math Lab (Ewing 224): This drop-in centre is freely available for your use to work on math homework and to seek help from the instructional assistant. Hours are posted on the door or online at camosun.ca/services/academic-supports/help-centres/math-help.

Academic Integrity: The Department of Mathematics and Statistics has prepared a handout called [*Student Guidelines for Academic Integrity*](#) to help you interpret college policies involving student conduct, academic dishonesty, plagiarism, etc. It is your responsibility to become familiar with the contents of the document and the college policies it references.

Calculator Policy: As per department policy, the only calculator permitted for use on tests and the final exam is the Sharp EL-531 (or EL-510R) scientific calculator. No other calculator or any other electronic device including cell phones, smartwatches, etc. is allowed.
