3. Intended Learning Outcomes

At completion of the course students will be able to...

- Use math vocabulary related to place value, estimating, ordering, adding, and subtracting whole numbers to 100.
- Identify place value and compare the magnitude of whole numbers.
- Round whole numbers to the nearest 10.
- Add whole numbers without carrying.
- Subtract whole numbers without borrowing.
- Count by 2s, 5s, and 10s.
- Use addition and subtraction to solve one-step application problems.
- Identify basic geometric shapes and time units.
- Work independently on the materials provided, and ask for help when needed.
- Use strategies to organize work and notes, and to manage time and math anxiety.

4. Course Content and Schedule

The course is designed to be completed in one term. However, it can be completed sooner. You will need to spend 10 – 15 hours per week on your math.

- For each topic of the book listed below, study the explanations and examples, then work through and check your answers to as many exercise problems as you need to fully understand.
- Ask for help when you have difficulties, or when you don't understand something.
- Complete the Self-Tests for each topic and check your answers, then to prepare for the unit Final Test, complete the Review problems at the end of each unit
- After clearing up any problems and correcting your errors, ask your instructor for authorization to write the unit Final Test.
- Review your Final Test results with the instructor, and proceed to the next unit if you score 75% or better, or rewrite the Final Test if you score less than 75%.
- Calculators may not be used on the Final Tests, unless approved by the instructor.
