#### 2. Intended Learning Outcomes

(complete ABE Intermediate Mathematics learning outcomes at ABE Articulation Handbook website http://www.aved.gov.bc.ca/abe/handbook.pdf)

At the end of the course, students will be able to:

- 1. use mathematics at an ABE Intermediate level with competence
- 2. demonstrate knowledge and skills in using the language, principles, and operations of introductory algebra
- 3. apply a variety of strategies in solving math-related problems
- 4. apply knowledge and skills in introductory algebra to solve problems
- 5. use knowledge of introductory algebra as a basis for further study in Advanced-level algebra, math for technology, and other courses and programs

### 3. Required Materials

- (a) textbook: Developmental Mathematics, 8<sup>th</sup> or 7<sup>th</sup> edition, Marvin Bittinger & Judith Beecher
- (b) scientific calculator (Sharp EL531W for MATH 072)

#### **Supplementary Materials**

- (c) Student's Solutions Manual, Judith Penna (for sale in the bookstore; available for reference in the classroom)
- (d) Instructor's Solutions Manual, Judith Penna (for reference in the classroom)
- (e) website www.mymathlab.com (online text, tutorials, videos, and testing)

#### 4. Course Content and Schedule

Classes run from July 3 to August 20, 2013.

The College will be closed on Monday, August 5, for BC Day.

#### **Self-paced Instructions**

The course completion time will vary for each student, depending on a number of factors, including your current level of math skills, motivation, learning rate, and how much time you have to study math, either at the college or at home. Students generally need to spend 5–15 hours of study time per week to complete each math course within 4 months.

- (a) before starting unit 1, students must pass a competency test to demonstrate that they can add, subtract, multiply, and divide whole numbers, fractions, and decimals <u>without the use of a calculator</u> if necessary, use the Arithmetic Review booklet to review these operations before writing the competency test
- (b) for each section of the 053 text listed in the table below, read the explanations, study the Examples, do the Margin Exercises, and then work through and check all or at least some of the more difficult odd-numbered problems in the Exercise Set
- (c) note that unit 4 includes text chapter 10, 11.1, & 11.2, and a supplement on exponents
- (d) to prepare for the final test for each unit, do the Summary and Review Exercises and write the Chapter Test at the end of the chapter, and correct all of your errors
- (e) review your final test results with the instructor, and proceed to the next unit if you score 75% or better, or rewrite the final test if you score less than 75% (all test scores count)
- (f) <u>note</u>: calculators are not allowed for parts of MATH 072 and for all of MATH 172, so 053 students who intend to take either of these courses should be able to add, subtract, multiply, and divide with whole numbers, fractions, and decimals, without the use of a calculator.
