2013W Semester classes run from January 7 - April 12, 2013

Our class meets on **Tuesday** and **Thursday** afternoons.

Other important dates:	February 11	Holiday, College Closed

	March 12	Withdrawal Deadline
	March 29, April 1	Holiday, College Closed
	April 11	Last class
	April 16	Final Tests

Self-paced Instructions

The course completion time will vary for each student, depending on a number of factors, including your current level of math skills, motivation, learning rate, and how much time you have to study math, either at the college or at home. Students generally need to spend 5–15 hours of study time per week to complete each math course within 4 months.

- (a) before starting unit 1, students must pass a competency test to demonstrate that they can add, subtract, multiply, and divide whole numbers, fractions, and decimals without the use of a calculator – if necessary, use the Arithmetic Review booklet to review these operations before writing the competency test
- (b) for each section of the 053 text listed in the table below, read the explanations, study the Examples, do the Margin Exercises, and then work through and check all or at least some of the more difficult odd-numbered problems in the Exercise Set
- (c) note that unit 4 includes text chapter 10, 11.1, & 11.2, and a supplement on exponents
- (d) to prepare for the final test for each unit, do the Summary and Review Exercises and write the Chapter Test at the end of the chapter, and correct all of your errors
- (e) review your final test results with the instructor, and proceed to the next unit if you score 75% or better, or rewrite the final test if you score less than 75% (all test scores count)
- (f) note: calculators are not allowed for parts of MATH 072 and for all of MATH 172, so 053 students who intend to take either of these courses should be able to add, subtract, multiply, and divide with whole numbers, fractions, and decimals, without the use of a calculator.
