Calendar Description
This course covers the second part of ABE Intermediate Math, and provides the introductory algebra and problem-solving skills required for further study in advancedlevel algebra, math for technology, and any course or program that requires Math 10. Topics include: real numbers, algebraic expressions, equations, inequalities, graphing, and polynomials.

Prerequisite(s): MATH 052, or assessment. http://camosun.ca/learn/calendar/current/web/math.html

## Required Materials

(a) textbook: Developmental Mathematics, $7^{\text {th }} / 8^{\text {th }}$ edition, Marvin Bittinger/Judith Beecher
(b) scientific calculator (Sharp EL-531X or EL-531W for next level MATH 072 or 135)

## Course Content and Schedule - Self-paced Instructions

The course is designed to be completed in one term. However, it can be completed sooner, depending on a number of factors including the students' beginning level of math skills, motivation, learning rate, and how much time they can actually study (average 1520 hours per week to complete in 4 months).

If you do not understand something seek help right away. In addition to online, resources include your family and friends, your instructor, and /or the Math Tutor Center.

Contact your instructor to get permission to write the unit exam. These exams will be written face-to-face.

Grade Calculation ${ }^{1}$ : 5 Unit Exams worth 75\% and a Final Exam worth 25\%

At the end of the course, students will be able to:

1. use mathematics at an $A B E$ Intermediate level with competence
2. demonstrate knowledge and skills in using the language, principles, and operations of introductory algebra
3. apply a variety of strategies in solving math-related problems
4. apply knowledge and skills in introductory algebra to solve problems
5. use knowledge of introductory algebra as a basis for further study in Advancedlevel algebra, math for technology, and other courses and programs

[^0]:    ${ }^{1}$ As this is a mastery-based course, the goal for each test is $75 \%$ or better. If you scored less than $75 \%$ then you will need to rewrite the test before you continue. Note: Tests can only be rewritten once for a total of two times and all test scores are averaged to calculate a final mark
