### Self-paced Instructions

The course completion time will vary for each student, depending on a number of factors, including your current level of math skills, motivation, learning rate, and how much time you have to study math, either at the college or at home.

For each unit of your Math 039 text listed in the table below,

- Skip the Pre-Test at the beginning of the text, as well as at the beginning of each Unit/Chapter
- Read the **Student Learning Outcomes**, the **Overview**, and **Review** sections for each math topic and study the **Examples**
- Do the odd numbered questions only (#1, 3, 5, etc.) in each of the **Practices**
- Check your answers in the back of the book (**Appendix C**); you can also record them in the "Score" column of your Course Outline below, if you wish
- (Optional) For additional review, if needed, do:
  - o post-tests and a pre-tests (answers at the back of the book)
  - o a unit review at the end of the chapter
  - o practice tests for all 13 units (Appendix B)
- Ask for each Module Test when ready
