Students will execute operations on the following topics: ratio, rate, proportion, percent, decimal/fraction/percent equivalents, graphs and tables. Students will accomplish automaticity and estimation skills to increase their confidence and competence in mathematics.

3. Intended Learning Outcomes

(complete ABE Fundamental Mathematics learning outcomes at ABE Articulation Handbook website https://www.bccat.ca/pubs/2018-19%20ABE%20Articulation%20Guide.pdf )

Table with 2 columns: Learning Outcome and Sub-outcomes / skills. It lists four learning outcomes and their corresponding sub-outcomes.

<p><b>5. Apply mathematical concepts and procedures to tasks of daily living</b></p>	<ul style="list-style-type: none"> <li>• Explain or show with examples the different elements of a graph</li> <li>• Identify different types of graphs (bar, line, circle, pictograph)</li> <li>• Estimate percentages</li> </ul>

The learning outcomes in this course meet those for Adult Literacy Fundamental Mathematics (ALFM) in the [BC ABE Articulation Handbook 2020/21 Edition](#). Please refer to the [guide](#) for relevant sample tasks.

#### 4. Required Materials

(a) textbook: *Adult Literacy Fundamental Mathematics Book Six*

##### Supplementary Materials

(b) additional math 026 materials are here: <https://sites.camosun.ca/acf-math/math-021-026/>

(c) three-ring binder, lined paper, graph paper

(d) pencils, eraser, ruler, highlighter, file cards

#### 5. Course Instructions and Content

- (a) for each topic of the book listed below, study the explanations and examples, then work through and check your answers to as many exercise problems as you need to fully understand
- (b) ask for help when you have difficulties, or when you don't understand something
- (c) complete the Self-Tests for each topic and check your answers, then to prepare for the unit Final Test, complete the Review problems at the end of each unit
- (d) after clearing up any problems and correcting your errors, ask your instructor for authorization to write the unit Final Test
- (e) review your Final Test results with the instructor, and proceed to the next unit if you score 75% or better, or rewrite the Final Test if you score less than 75%
- (f) calculators may not be used on the Final Tests, unless approved by the instructor

The course completion time will vary for each student, depending on a number of factors, including your current level of math skills, motivation, learning rate, and how much time you have to study math, either at the college or at home. Students generally need to spend 5–15 hours of study time per week to complete each math course within a reasonable amount of time.
