CAMOSUN COLLEGE GEOGRAPHY 100 ECOSYSTEMS AND NATURAL RESOURCES

Course Outline, Fall 2002

Instructor: Hilary Sandford Office: Ewing 304 Phone: 370-3372

Email: sandford@camosun.bc.ca

angusdog@island.net

COURSE DESCRIPTION:

This course is intended to acquaint students with the characteristics of our physical environment and the influence our human activity has on these surroundings. At the conclusion of the course, the student will be expected to know the properties of earth's major ecosystems and biomes; human population dynamics; and resource availability and conservation. The emphasis of lecture coverage will range from a global scale to local issues and concerns.

LEARNING OPPORTUNITIES:

<u>Lectures</u>: There will be two hours of lecture a week. The blackboard will be heavily utilized and overheads and slides will augment the traditional lecture style.

<u>Labs</u>: There are nine labs in the course. Each lab contains exercises to familiarize students with the tools of geography and many of the issues faced by geographers. Attendance during lab periods is <u>mandatory</u>. In the case of illness, the instructor must be contacted <u>prior</u> to the class time and an alternate arrangement must be made; otherwise, a mark of zero will be assigned. All labs are worth 2% each, except Labs 4, 6 and 7, which are worth 5%, 3.5% and 3.5% respectively.

<u>Presentations</u>: The course material can, at times, become moderately depressing. To counteract any feelings of bleakness that might occur from this immersion, 10% of your mark is placed on a more optimistic project. You are responsible for researching and designing a 7-8 minute presentation on a person/group/company that has or is making a positive contribution to the environmental health of this city/province/globe OR that has created an innovative solution to a local/national/international problem.

<u>Audio Reviews</u>: David Suzuki produced an audio series for the C.B.C. Program *Ideas* in the winter of 1999. These tape cassettes are available on reserve in the library. You will be required to listen to them and take notes on what you hear. These notes will then be submitted for a pass/fail grade.

<u>Audio Review Due Dates</u>: Summary of Episode 2: Big Foot Sept 18
Summary of Episode 8: Complex Pleasures Nov 27

<u>Midterm Exam</u>: Two midterm exams will be given during the term. They will be held on **October 9** and **November 13** and will be a selection of short-answer, multiple-choice, and short essay-type questions.

<u>Final Exam</u>: There will be a three-hour final exam during Exam Week. This exam will be comprehensive, requiring students to demonstrate knowledge of the important concepts presented during the whole course, but the emphasis will be placed on material from the second half of the course.

EVALUATION:

Midterm Exam 1	15%
Midterm Exam 2	20%
Lab Exercises	24%
Presentation	10%
Participation	3%
Audio Reviews	2%
Final Exam	<u>26%</u>
	100%

TEXTBOOK:

Our Environment: A Canadian Perspective by Diane Draper, ITP Nelson Publishing, 1998.

There are two versions of the textbook available; the newest edition is sold by the bookstore but, since it is an expensive hard-cover, you are welcome to use second-hand copies of the old edition. I have also requested that two copies of the textbook be placed on reserve in the library for your use.

GRADING:

The standard grading scale of the Division of Arts and Science will be used for this course.

A+	>95%		B-	70-74%
A	90-94%	C+	65-69%	
A-	85-89%	C	60-64%	
B+	80-84%	D	50-59%	
В	75-79%	F	< 50%
