

ENVR 204 – Environmental Field Trips

Spring 2003

This course is comprised of several field trip experiences which will include visits to various locations on Southern Vancouver Island. The goal of this course is to gain a first-hand look into local 'environmental issues'.

This year, the trips will be May 8th, June 19th, and June 20st. The class will travel to Mt Tolmie for a part-day of birding on May 8th and will go on all day excursions to Yellowpoint, Duncan, and Sooke by bus on June 19th and 20st. On those days we will leave campus at 8:30 and try to be back by 5:00. Please bring a packed lunch and snacks/drinks because we will not be stopping at spots where food is sold. Also, dress for the day! A hat, substantial footwear, and sunscreen are suggested.

To receive a letter grade for ENVR 204 (and not an 'I' for incomplete), you must attend all field trips. Field trip notes should be recorded in your Field Book and handed in at the end of the day on the 20st along with any other assignments from the Spring term that have not been completed prior to this time.

Your field trip notes for June 19/20 should include (for each place we visit)

Where

When and how long

Who

What

Factual information/your comments (5-10 sentences minimum)

May 8th – Birding with Warren Drinnan

June 19th - Wildwood at Yellowpoint – Sustainable Forestry
Duncan Fish Hatchery
Cowichan First Nations Center

June 20th – DND Property at Rocky Point – Old Growth Forest
Recently logged site near Sooke
