The success of this course is dependent on each student actively participating in both open discussions and group-based discussions during class time. In order to fully contribute to these discussions it is imperative that each student complete the course readings and come prepared to contribute their understanding, opinions, and analysis of the subject materials. Participation marks will be awarded by a combination of self, peer and instructor assessment. Each student will evaluate their group members based on that person's contribution to group work. The evaluation will based on criteria that I have set out on an evaluation form and carries a value of 5 of the 10 marks. The mark awarded to each student will be the average of all other group member's marks. The other 5 marks will be an average of my assessment and your own self assessment using the same criteria and evaluation forms. Another form of participation will be through contributions made to the class journal. This opportunity will be discussed further in class.

## 8. Class Discussion Rules

The first and most fundamental principle for participation in this class is that of respect. This will be expected of all persons present both in and out of class while engaged in the discussion of class material.

Please remember the guidelines during class discussions:

- -participation in discussion is encouraged; remember not to take more than your fair share of class time to present your perspective or point of view.
- -your contributions should be couched in respectful language, free of intense emotions, and should not be critical of the presenter, or otherwise personalized. Identify and criticize a statement point of view, opinion or belief; identify why your disagree with the statement not the messenger.
- -speak respectfully to and about groups whether or not they are represented in class. Remarks that stereotype a group or are sexist, homphobic, racist etc. damage the class atmosphere and will be respectfully challenged.
- -everyone has the right to make mistakes, even the instructor; this is how learning occurs and it contributes to intellectual growth. Let's be patient and respectful of one another's intellectual and personal growth.
- -If speaking in class is really difficult for you, please come see me to discuss other ways of contributing as soon as possible.
