### School of Arts & Science Biology Department Biology 153-X04, Anatomy and Physiology 2 Winter 2005

# **COURSE OUTLINE**

 $\Omega$  Please note: This outline will not be kept indefinitely. It is recommended students keep this outline for your records.

#### 1. Instructor Information

- (a) Don MacRae
- (b) Office hours: TBA
- (c) Location: F 346A
- (d) Phone: 370-3437
- (e) e-mail: dmacrae@camosun.bc.ca

#### 2. Intended Learning Outcomes

Upon successful completion of Biology 152 and Biology 153, the student will be able to:

- use knowledge of normal anatomy and physiology to differentiate normal from abnormal when doing physical assessments of clients
- use and understand correct terminology when communicating with clients and other members of the health care team
- use knowledge of anatomy and physiology as a basis for further study of pathophysiology
- demonstrate the ability to apply knowledge of anatomy and physiology gained through laboratory activities to the clinical setting
- help clients by explaining basic anatomy and physiology, nutrition and pharmacology in the maintenance of health and the prevention of disease

# 3. Required Materials

# a) Texts

\*Martini, F. (2004). *Fundamentals of Anatomy and Physiology.* (6<sup>th</sup> Ed.) Benjamin Cummings, San Francisco.

Camosun College, Department of Biology. *Biology 152: Course Outline, Learning Objectives and Laboratory Directions* — Fall 2004.

\*\*Dugas, B., Esson, L. & Ronaldson, S. (1999). *Nursing foundations: A Canadian Perspective.* (2<sup>nd</sup> Ed.) Scarborough, Ontario: Prentice Hall Canada Inc.

\*\*Estes, M. (2002). Clinical companion for health assessment and physical examination. (2nd Ed) Toronto: Delmar Publishers.

\*\*Eisenhauer, L., Wemett, L., Spencer, R., & Burgan, F. (1998). *Clinical pharmacology & nursing management.* (5<sup>th</sup> Ed.) New York: Lippincott.

#### b) Other materials

Lab coat. Students are expected to wear a lab coat during most labs. Cloth coats are referable but disposable coats are acceptable and can be used for the two semesters of biology.

#### **Optional materials:**

\*Martini, F. and Welch, K. (2004). *Applications Manual: Fundamentals of Anatomy and Physiology.* (6<sup>th</sup> Ed.) Benjamin Cummings, San Francisco.

\*Martini, F. (2004). *Martini's Atlas of the Human Body.* Benjamin Cummings, San Francisco.

\*Martini, F. (2004). Interactive Physiology, 8 System Suite, Benjamin Cummings, San Francisco.

\* Packaged together. Optional materials included at same cost as text book alone.

\*\*Also required for and used in NURS courses.

### 4. Course Schedule

|          | Dates         | Lecture                          | Lab Activity                          |
|----------|---------------|----------------------------------|---------------------------------------|
| 1        | Jan 10-14     | Cardiovascular System            | LAB 1: Lab Safety                     |
|          |               | (Continued from Biol 152)        |                                       |
| 2        | Jan 17-21     | Cardiovascular System            | LAB 2: Cardiovascular ECG             |
|          |               | Nursing – Cardiovascular         |                                       |
| 3        | Jan 24-28     | Respiratory System               | LAB 3: Respiratory System Anatomy     |
| 4        | Jan 31- Feb 4 | Respiratory System               | LAB 4 : Respiratory Physiology        |
|          |               | Nursing – temperature and        |                                       |
| <u> </u> |               | respiratory regulation           |                                       |
| 5        | Feb /-11      | Digestive System                 | NO LAB                                |
|          | Feb 10-11     |                                  |                                       |
|          |               |                                  |                                       |
| 6        | Feb 14-18     | Digestive System                 | LAB 5: Digestive System and Nutrition |
|          |               | Nursing: Nutrition, bowel        |                                       |
|          |               | elimination                      |                                       |
| 7        | Feb 21-25     | Digestion                        | LAB EXAM #1                           |
|          |               | Metabolism                       |                                       |
| 8        | Feb 28- Mar 4 | MIDTERM EXAM                     | LAB 6: Microbiology 1                 |
|          |               | Microbiology                     |                                       |
| 9        | Mar 7-11      | Microbiology                     | LAB 7: Microbiology 2                 |
|          |               | Nursing: Prevention of Infection |                                       |
| 10       | Mar 1/1-18    | Lymphatic System / Immunology    | LAB & Lymphatic System                |
| 10       | Iviai 14-10   | Lymphalic System / immunology    | LAD 6. Lymphatic System               |
| 11       | Mar 21-25     | Urinary System                   |                                       |
|          | Mar 25        | EASTER                           | NO LAB                                |
| 12       | Mar 28        | EASTER                           |                                       |
|          | Mar 28-       | Urinary System                   | LAB 9: Urinary System/Urinalysis      |
|          | April 11      | Nursing – Urinary elimination    |                                       |
| 13       | April 4-8     | Urinary System                   | LAB EXAM #2                           |
|          |               | Reproductive System              |                                       |
| 14       | April 11-15   | Reproductive System              | LAB 10: Reproductive System           |
| 15/16    | April 18-26   | FINAL COMPREHENSIVE EXAM         |                                       |
|          |               | College exam period              |                                       |
|          |               | Date TBA                         |                                       |

# 5. Basis of Student Assessment (Weighting)

| Assignments, quizzes | 10% |
|----------------------|-----|
| Midterm Lab Exam     | 10% |
| Final Lab Exam       | 15% |
| Midterm Lecture Exam | 30% |
| Final Lecture Exam   | 35% |

- a) The lecture exams will cover the topics that have been discussed during lecture time. Most of these topics have also been reinforced during laboratory time.
- b) Laboratory exams include a practical component; for example, the identification of structures from anatomical models and images.

- c) Both Final Lecture and final Lab exams are comprehensive cover the whole semester
- d) Lecture exam will include both the nursing and biology components of the course.
- e) Exams will be held at times indicated on the Course Schedule. If a student is unable to attend either the lab or the lecture midterm exam because of illness or emergency they should notify the instructor of the situation in advance of the examination. Upon receiving acceptable supporting documentation, the following accommodations will be available:
  - 1) if the Midterm Lab Exam is missed, the Final Lab Exam will be counted towards 25% of the final grade
  - if the Midterm Lecture Exam is missed, a make-up Lecture Exam will be scheduled during week 13. This exam will cover all topics up to and including week 12.

### 6. Grading System

The following percentage conversion to letter grade will be used:

| A+ = 95 - 100% | B = 75 - 79%  | D = 50 - 59%  |
|----------------|---------------|---------------|
| A = 90 - 94%   | B- = 70 - 74% | F = 0.0 - 49% |
| A- = 85 - 89%  | C+=65-69%     |               |
| B+ = 80 - 84%  | C = 60 - 64%  |               |

#### 7. Recommended Materials or Services to Assist Students to Succeed Throughout the Course

It is important that you are familiar with material that has already been covered in the prerequisite courses, Biology 12 or 080 and Chemistry 11. This information is necessary in order to understand concepts taught in Biology 152. Students are expected to review this prerequisite material, as it too is testable.

# LEARNING SUPPORT AND SERVICES FOR STUDENTS

Learning Skills offers assistance to learners in a variety of ways. <u>http://www.camosun.bc.ca/students/learningskills/index.htm</u>

# ACADEMIC CONDUCT POLICY

There is an Academic Conduct Policy. It is the student's responsibility to become familiar with the content of this policy. The policy is available in each School Administration Office, Registration, and on the College web site in the Policy Section. http://www.camosun.bc.ca/policies/E-2.5-Student-Conduct.pdf
