

**GEOGRAPHY 102 — Human Geography
Winter 2005 - Section 01**

Instructor: Dr. Bernard Henin
Office: Fisher 324
E-mail: bhenin@uvic.ca
Phone: 370-3931
Course Web Page: <http://www.geog.uvic.ca/bhenin/www>
Office Hours: Tues and Thu 3:00 to 3:30 pm + appointments

Class schedule: Mon and Wed — 8:30 to 10:20am
Room: Fisher 338

COURSE DESCRIPTION

This university transfer course is an introduction to the spatial patterns of human activities and their relationship to the environment. The course aims to describe and explain the spatial variations of cultural characteristics and change at the local, regional and international levels. It emphasizes patterns, processes and problems in the growth of human populations, migration, cultural development, religions, geopolitical systems, economic development, settlement and urbanization, and human-environment relationships.

COURSE REQUIREMENTS AND PREREQUISITES

- Credit Value: 3
- In-class Workload: 8 hours lecture, lab, and seminar per week
- Out-of-class Workload: 8-10 hours per week
- Prerequisites: C+ in English 12 or assessment
- Transferability: UVIC, UBC, SFU and others

REQUIRED TEXTBOOKS

Knox, Paul L., Marston, Sallie A. and Nash, Alan E. 2004. Human Geography: Places and Regions in Global Context. Canadian Edition. Upper Saddle River: Prentice Hall.

Stanford, Quentin H., ed. 2003. Canadian Oxford World Atlas. 5th ed. Toronto: Oxford University Press.

ASSIGNMENTS

Map Exercise (5%): one map interpretation exercise will be assigned at the beginning of the term. This assignment is due a week later.

Lab exercises (20%): a total of four exercises will be assigned during the semester. Each exercise will carry equal marks. These exercises are designed to help you understand the material of the course and thus prepare you for the formal tests. All exercises are to be submitted on the date specified in the timetable (see last page of this outline). ***Late assignments will be penalized.***

Research project (25%):

Students will form groups (2 or 3 students per group) to research a specific geographical issue. This will require searching for published articles in the library and on the web. Each group will then present their results in class (15 minutes) in a period assigned during the last two weeks of classes. The instructor will provide a list of topics, approve the research topic and organize the order of presentations. No rescheduling of presentations will be permitted.

You will first submit a one-page outline of your presentation, including your objectives, methodologies, approaches, and a short list of source materials at a specified date (see timetable), several weeks before the presentation.

The evaluation of the presentation itself will be based on content, organization and research depth, as well as speaking style, illustration with audio-visual materials and time management. The audio-visual materials will include any choice of photo-posters, overheads, slides and Powerpoint data projector. Based on these criteria, the presentation will be worth 20% of the total marks for the course. It is recommended to hand out a one-page summary of your presentation to each student before speaking. This should include the presentation title, objectives, background, main results, conclusion and references. Be concise. Use bullet lists.

TESTS

Test 1 (20%): The first test will be based on the materials of the readings, lectures and labs covered during the first six weeks of the course. See schedule of activities for the test date.

Test 2 (20%): The second test will be based on the materials covered after the first test. See schedule of activities for the test date.

Important Note: Students who miss a scheduled examination will be asked to produce a doctor's certificate or equivalent. My policy for missed assignments and tests is described in a separate handout.

EVALUATION

4 Labs (5% each)	20%
Map exercise	5%
2 Tests (20% each)	40%
Research project outline	5%
Research project presentation	20%
Class participation	10%
Total	100%

Performance Report: The instructor will provide students with an updated report on their performance on a regular basis. Students are advised to consult the instructor before the last withdrawal day to ensure all available options have been reviewed.

GRADING

Mark	Grade	Mark	Grade	Mark	Grade
95-100%	A+	90-94%	A	85-89%	A-
80-84%	B+	75-79%	B	70-74%	B-
65-69%	C+	60-64%	C		
50-59%	D	<50%	F		

COURSE TOPIC UNITS

The course is organized into nine topics:

Topic 1. Basic concepts in human geography

This topic introduces the field of geography, its basic concepts and approaches, and major geographical methodologies and philosophical thoughts.

Topic 2. Spatial analysis

This topic focuses on methods of spatial analysis in human geography. The main objective is to interpret thematic maps.

Topic 3. Globalization

This topic investigates the spatial processes of globalization.

Topic 4. Culture

This unit outlines the concepts of culture and the evolution from hunting and gathering society to agricultural society. The geographical origins, distribution and spatial distribution and impacts of major languages and religions are also discussed.

Topic 5. Population.

This unit examines the key indicators and issues of demographic structure, population policies and distribution in both developed and developing countries. The patterns, factors and explanations of migration at local, regional, and international scales are also highlighted.

Topic 6. Urbanization

This unit highlights the spatial organizations and functions of urban systems with particular emphasis on the patterns of urban and rural settlement, urbanization, and models of urban system and internal structures.

Topic 7. Economic development

This unit focuses on the spatial patterns of production, distribution, and consumption of primary, secondary and tertiary activities. The lectures review the factors and locational models of manufacturing activities and the indicators and explanations of economic development.

Topic 8. Agriculture

This unit focuses on the spatial patterns of production, distribution, and consumption of agricultural product. It examines the impact of global trade on agriculture.

Topic 9. Political geography

This topic focuses on functions of political systems with particular emphasis on the evolution of the state, boundary conflicts, and geopolitical strategies and issues.

Note that, where appropriate, an emphasis will be given to human-environment relationships.

INSTRUCTIONAL FRAMEWORK

- **Lectures**: provide an outline for understanding and interpreting materials essential to course objectives, learning outcomes and course assignments. Lectures are intended to highlight major concepts, clarify text and supplementary materials, and raise awareness of issues.
- **Discussion**: is an integral part of the course and every one is encouraged to raise questions, elaborate upon, or seek clarification of, course content during lectures, labs and seminars. Class participation is worth 10% of the marks.
- **Audio-visual Materials**: a variety of audio-visual materials (films, videos, slides, overheads, etc.) will be used in conjunction with lectures and seminars to illustrate the major concepts and issues.
- **Readings**: include both required and supplementary materials. The required readings provide essential materials in achieving course objectives. The readings should be read both before and after the lectures. Supplementary readings offer additional opportunities to study in-depth on certain topics.
- **Tests**: Two in-class tests will be conducted to evaluate the extent to which individual students are meeting course objectives and learning outcomes.
- **Exercises**: The exercises assigned for this course will help you understand and consolidate the concepts covered in lectures and readings. They also will serve to evaluate the degree to which individual students are meeting course objectives and learning outcomes.
- **Presentation**: The objective of the presentation assignment is to train students to conduct a research project in groups and present the results collectively to an audience. This exercise will help students practice public speaking techniques and improve their understanding of the issues from constructive feedback.
- **Attendance**: I expect regular attendance and participation in lectures and seminars. I will record the attendance on a regular basis. I strongly recommend that students inform me if they expect to be absent for more than a week.

READING LIST

Required readings are marked with an asterisk (*). The other readings are recommended. They are available from the library on a 3-day loan.

Topic 1— Basic concepts in human geography

- * Knox, Paul L., Marston, Sallie A. and Nash, Alan E. 2004. 'Chapter 1: Geography Matters', in *Human Geography: Places and Regions in Global Context*, pp. 1-26.
- * Knox, Paul L., Marston, Sallie A. and Nash, Alan E. 2004. 'Chapter 6: Interpreting Places and Landscapes-Place Making/Place Marketing', in *Human Geography: Places and Regions in Global Context*, pp. 250-3.
- Kobayashi, Audrey. 2001. "'Truly our own: Canadian geography 50 years after.'" Canadian Geographer 45 (1): 3-8.
- Pattison, William. D. 1990. "The four traditions of geography." Journal of Geography 89:202-206.
- Wynn, Graeme. 1999. "A fine balance? Geography at the Millennium." Canadian Geographer 43, 1:220-243.

Topic 2. Spatial analysis

- * Knox, Paul L., Marston, Sallie A. and Nash, Alan E. 2004. 'Chapter 1: Geography Matters', in *Human Geography: Places and Regions in Global Context*, pp. 26-50.
- Stanford, Quentin H., ed. 1998. *Canadian Oxford World Atlas*, 4th ed. Toronto: Oxford University Press.

Topic 3. Globalization
