2. Intended Learning Outcomes

Upon completion of this course the student will be able to:

1. Demonstrate a knowledge of ecological systems and the impact of human activity on those systems.
2. Demonstrate an understanding of key environmental issues.
3. Demonstrate a knowledge of courses of action which address environmental concerns.

3. Required Materials

(a)	Texts	Our Environment: A Canadian Perspective. Draper and Reed
-----	-------	--

4. Course Content and Schedule

COURSE CONTENT:

Lectures: There will be two hours of lecture a week on Tuesdays. The blackboard will be heavily utilized and overheads and slides will augment the traditional lecture style.

Labs: There are ten labs in the course. Each lab contains exercises to familiarize students with environmental issues, government and non-profit web sites, and the tools of geographic analysis. Most lab exercises, due to their use of Internet information, will be taken home for completion. Due dates will be assigned in class.

Midterm Exam: The midterm exam will be held on **OCTOBER 17th** and will be a selection of short-answer, multiple-choice, and short essay-type questions. A practice exam will be provided to students for preparation purposes.

Presentations: The course material can, at times, become moderately depressing. To counteract any feelings of bleakness that might occur, 15% of your mark is placed on a more optimistic project. You are responsible for researching and designing a 7-8 minute presentation on a person/group/company that has or is making a positive contribution to the environmental health of this city/province/globe OR that has created an innovative solution to a problem. The use of PowerPoint is allowed but discouraged.

Final Exam: There will be a three-hour final exam during Exam Week. This exam will be comprehensive but the emphasis will be placed on material from the second half of the course.
