Upon completion of this course the student will be able to:

- 1. Describe, using anatomical terminology, the human body at the tissue, organ and organ system levels.
- 2. Locate and identify gross and microscopic anatomical structures associated with the 11 human organ systems in slides, models, photographs, diagrams and dissections.
- 3. Interpret the relationships between anatomical structures in sectional planes of the human body, and describe these relationships using regional and directional terminology.
- 4. Relate anatomical structures to their basic functions and predict how changes in one would logically be expected to result in changes in the other.
- 5. Locate and identify surface anatomical structures by palpation.
- 6. Define anatomical and physiological terms, and apply this terminology in the context of human health science.

3. Required Materials

- (a) Texts: Anatomy & Physiology (7th ed) Seeley R., Stephens T., Tate P. McGraw Hill (2006). Or Anatomy and Physiology (7th ed.) Martini F. H. William C. Pearson (2006)

Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading scheme being used in the course. See Grading Policy E-1.5 at **camosun.ca** for information on conversion to final grades, and for additional information on student record and transcript notations.

Temporary Grade	Description
I	Incomplete: A temporary grade assigned when the requirements of a course have not yet been completed due to hardship or extenuating circumstances, such as illness or death in the family.
IP	In progress: A temporary grade assigned for courses that, due to design may require a further enrollment in the same course. No more than two IP grades will be assigned for the same course. (For these courses a final grade will be assigned to either the 3 rd course attempt or at the point of course completion.)

CW

Compulsory Withdrawal: A temporary grade assigned by a Dean when an instructor, after documenting the prescriptive strategies applied and consulting with peers, deems that a student is unsafe to self or others and must be removed from the lab, practicum, worksite, or field placement.

7. Recommended Materials or Services to Assist Students to Succeed Throughout the Course

LEARNING SUPPORT AND SERVICES FOR STUDENTS
