COURSE OUTLINE

The course description is online @ http://camosun.ca/learn/calendar/current/web/math.html

Ω   *Please note: the College electronically stores this outline for five (5) years only.*
   *It is **strongly recommended** you keep a copy of this outline with your academic records.*
   You will need this outline for any future application/s for transfer credit/s to other colleges/universities.

1.   Instructor Information

(a)	Instructor:		
(b)	Office Hours:		
(c)	Location:		
(d)	Phone:	Alternative Phone:	
(e)	Email:		
(f)	Website:		

2.   Intended Learning Outcomes
(No changes are to be made to these Intended Learning Outcomes as approved by the Education Council of Camosun College.)

Upon completion of this course the student will be able to:

1.   Use truth tables to establish the equivalence of compound propositions.
2.   Translate English sentences into quantified logic statements.
3.   Prove set equivalences using membership, basic set identities and logical equivalences.
4.   Determine whether basic functions are surjective, injective or bijective.
5.   Describe the growth of functions using big-O, big Omega and big-Theta notation.
6.   Write simple algorithms in pseudocode.
7.   Use the fundamental concepts of number theory to solve problems concerning divisibility, prime factorization and congruences.
8.   Perform computations with matrices, including Boolean operations on zero-one matrices.
9.   Perform simple direct and indirect proofs, and proofs using mathematical induction.
10. Show how functions and sequences can be defined recursively.
11. Use permutations and combinations to solve counting and probability problems, including those in which repetition is allowed.
12. Determine whether a relation is an equivalence relation or is partially ordered.
13. Identify and describe different types of graphs and their connectivity.
14. Solve a shortest-path problem.
15. Use the concept of a tree to solve problems involving Huffman Codes and RPN.

3.   Required Materials

(a) Texts

(b) Other

4.   Course Content and Schedule
(This section can include: class hours, lab hours, out of class requirements and/or dates for quizzes, exams, lectures, labs, seminars, practicums, etc.)

5.   Basis of Student Assessment (Weighting)
(This section should be directly linked to the Intended Learning Outcomes)

(a) Assignments

(b) Quizzes

(c) Exams

(d) Other (e.g., Attendance, Project, Group Work)

6. Grading System
(No changes are to be made to this section unless the Approved Course Description has been forwarded through the Education Council of Camosun College for approval.)

Standard Grading System (GPA)

Percentage	Grade	Description	Grade Point Equivalency
90-100	A+		9
85-89	A		8
80-84	A-		7
77-79	B+		6
73-76	B		5
70-72	B-		4
65-69	C+		3
60-64	C		2
50-59	D	Minimum level of achievement for which credit is granted; a course with a "D" grade cannot be used as a prerequisite.	1
0-49	F	Minimum level has not been achieved.	0

Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading scheme being used in the course. See Grading Policy E-1.5 at **camosun.ca** for information on conversion to final grades, and for additional information on student record and transcript notations.

Temporary Grade	Description
I	*Incomplete*: A temporary grade assigned when the requirements of a course have not yet been completed due to hardship or extenuating circumstances, such as illness or death in the family.
IP	*In progress*: A temporary grade assigned for courses that, due to design may require a further enrollment in the same course. No more than two IP grades will be assigned for the same course. *(For these courses a final grade will be assigned to either the 3rd course attempt or at the point of course completion.)*
CW	*Compulsory Withdrawal:* A temporary grade assigned by a Dean when an instructor, after documenting the prescriptive strategies applied and consulting with peers, deems that a student is unsafe to self or others and must be removed from the lab, practicum, worksite, or field placement.

7. Recommended Materials or Services to Assist Students to Succeed Throughout the Course

LEARNING SUPPORT AND SERVICES FOR STUDENTS

There are a variety of services available for students to assist them throughout their learning.
This information is available in the College calendar, at Student Services, or the College web site at
camosun.ca.

STUDENT CONDUCT POLICY

There is a Student Conduct Policy **which includes plagiarism**.
It is the student's responsibility to become familiar with the content of this policy.
The policy is available in each School Administration Office, at Student Services,
and the College web site in the Policy Section.

ADDITIONAL COMMENTS AS APPROPRIATE OR AS REQUIRED

Mathematics 126
Basic Discrete Mathematics
Winter, 2010

Instructor: George Ballinger
Office: Ewing 256
E-mail: ballinger@camosun.bc.ca
Website: ballinger.disted.camosun.bc.ca (click the MATH 126 link for course information)
Telephone: (250) 370-3116
Timetable:

Time	Monday	Tuesday	Wednesday	Thursday	Friday
8:30 am – 9:20 am	MATH 100-001 Room E346	MATH 100-001 Room E346	MATH 100-001 Room E346	MATH 100-001 Room E346	MATH 100-001 Room E346
9:30 am – 10:20 am					
10:30 am – 11:20 am	Office Hour E256	Office Hour E256	Office Hour E256	Office Hour E256	Office Hour E256
11:30 am – 12:20 pm	MATH 126 Room E346	MATH 126 Room E346	MATH 126 Room E346		MATH 126 Room E346
12:30 pm – 1:20 pm	MATH 100-002 Room E346	MATH 100-002 Room E346	MATH 100-002 Room E346	MATH 100-002 Room E346	MATH 100-002 Room E346
1:30 pm – 2:20 pm					

Important Dates:

January 6	First day of class
January 20	Tuition fee deadline
February 18-19	Reading Break (no class)
March 10	Withdrawal date deadline
April 2	Good Friday (no class)
April 5	Easter Monday (no class)
April 9	Last day of class
April 12-17, 19-20	Final Exam Period

Prerequisites: C in MATH 100 or MATH 110.

Exit grade: B+ (77%) or better in MATH 126 (or MATH 110) is required for admission into MATH 230 "Modern Algebra".

C (60%) or better in MATH 126 is required for admission into COMP 227 "Discrete and Combinatorial Structures" and COMP 210 "Data Structures and Algorithms".

D (50%) or better in MATH 126 will earn you transfer credit for UVic's MATH 122 "Logic and Foundations" course.

Calendar Description: For students in Math or Computer Science. Topics include: logic and proofs, set theory, number systems, relations and functions, counting techniques, algorithms, complexity and a brief introduction to graphs. [3 Credits]

(Source: Camosun College 2009-2010 Calendar
camosun.ca/learn/calendar/current/web/math.html)

Required Textbook: K.H. Rosen, *Discrete Mathematics and Its Applications*, Sixth Edition, McGraw-Hill, Boston, 2007.

Course Content:

Chapter 1   *The Foundations: Logic and Proofs*
- 1.1   Propositional Logic
- 1.2   Propositional Equivalences
- 1.3   Predicates and Quantifiers
- 1.4   Nested Quantifiers
- 1.5   Rules of Inference
- 1.6   Introduction to Proofs
- 1.7   Proof Methods and Strategy

Chapter 2   *Basic Structures: Sets, Functions, Sequences, and Sums*
- 2.1   Sets
- 2.2   Set Operations
- 2.3   Functions

Chapter 3   *The Fundamentals: Algorithms, the Integers, and Matrices*
- 3.1   Algorithms
- 3.2   The Growth of Functions
- 3.3   Complexity of Algorithms
- 3.4   The Integers and Division
- 3.5   Primes and Greatest Common Divisors
- 3.6   Integers and Algorithms

Chapter 4   *Induction and Recursion*
- 4.1   Mathematical Induction
- 4.2   Strong Induction and Well-Ordering
- 4.3   Recursive Definitions and Structural Induction

Chapter 5   *Counting*
- 5.1   The Basics of Counting
- 5.2   The Pigeonhole Principle
- 5.3   Permutations and Combinations
- 5.4   Binomial Coefficients
- 5.5   Generalized Permutations and Combinations

Chapter 6   *Discrete Probability*
- 6.1   An Introduction to Discrete Probability

Chapter 7   *Advanced Counting Techniques*
- 7.1   Recurrence Relations
- 7.2   Solving Linear Recurrence Relations

Chapter 9   *Graphs*
- 9.1   Graphs and Graph Models
- 9.2   Graph Terminology and Special Types of Graphs
- 9.3   Representing Graphs and Graph Isomorphism
- 9.4   Connectivity
- 9.5   Euler and Hamilton Paths

Chapter 10 *Trees*
- 10.1 Introduction to Trees
- 10.2 Applications of Trees

Calculator Policy: As per Math Department policy, the only calculator permitted for use on tests and the final exam is the Sharp EL-531W scientific calculator. No other make/model of calculator is permitted, nor are other electronic devices such as cell phones, iPods, electronic translators, etc.

Math Labs:	Ewing 224 & 342: These drop-in centres are freely available for your use to work on math homework and to seek help from the tutor on staff (see hours posted on door).
Study Time:	It is recommended that approximately 6-8 hours per week be spent studying for this course outside of class time.
Homework:	Periodic assignments will be given for homework. Assignments and due dates will be posted on the course website. You are responsible for regularly checking the website and handing in assignments on time. Late assignments will **NOT** be accepted.
Tests:	There will be three term tests, details for which will be posted on the course website.
Final Exam:	A comprehensive final exam will take place during the final exam period of April 12-17, 19-20. The specific date, time, and location will be announced sometime in February. You must write the final exam at this time as per Camosun College's policy on final examinations. See p. 33 on camosun.ca/learn/calendar/current/pdf/academic.pdf.
Grade Calculation:	The final grade will be calculated according to the following breakdown:

Assignments (best 7 of 8): 14%*
Three Term Tests: 36%
Final Exam: 50% or 100%**

Note: The lowest assignment mark will be dropped when calculating the assignment average. This allows you to miss one assignment without penalty.

** *Note:* Your final exam mark can count for 100% of your grade **provided that your term work has been satisfactorily completed.**

Grade Scale: Final letter grades are assigned as follows:

0-49	50-59	60-64	65-69	70-72	73-76	77-79	80-84	85-89	90-100
F	D	C	C+	B−	B	B+	A−	A	A+

For information on Camosun College's grading policy, see Sec E-1.5 on the policy webpage camosun.ca/about/policies/policies.html.

What is Discrete Math? According to Wikipedia, "Discrete mathematics, also called finite mathematics, is the study of mathematical structures that are fundamentally discrete in the sense of not supporting or requiring the notion of continuity. Objects studied in discrete mathematics are largely countable sets such as integers, finite graphs, and formal languages.

"Discrete mathematics has become popular in recent decades because of its applications to computer science. Concepts and notations from discrete mathematics are useful to study or describe objects or problems in computer algorithms and programming languages.

"In some mathematics curricula, finite mathematics courses cover discrete mathematical concepts for business, whereas discrete mathematics courses emphasize concepts for computer science majors, and combinatorics and other specialized courses emphasize the mathematical theory."
