

CAMOSUN COLLEGE School of Arts & Science Biology Department

BIOL 144: Physiology for Sport Education Winter 2010

COURSE OUTLINE

CALENDAR DESCRIPTION

Physiological processes are studied in a laboratory setting at the chemical, cellular and organ system level. Laboratory skills are emphasized with a focus on data collection, data presentation and data analysis in the context of scientific method. Students in this course will apply critical thinking in the context of physiological homeostasis, particularly as it relates to exercise and health. This course is designed for students in the Exercise and Wellness diploma program and the Athletic and Exercise Therapy degree program.

PREREQUISITES

Grade of C+ or better in English 12; Grade 11 level science, Math 11, Biology 143

1. Instructor Information

Instructor: Douglas Panton Office hrs: TBA Location: CC118A Phone: TBA E-mail: pantond@camosun.bc.ca Web site: http://hunterp.disted.camosun.bc.ca

2. Required Materials

Text: Human Physiology (5th. Edition), Dee Unglaub Silvrthorn

Lab Manual: Biology 144: Physiology Labs for Sport Education, (labs are printed from the course website)

3. Course Particulars

Class hours: 3 hrs lecture / week and 3 hrs lab / week Credits : 4 credits

4. Intended Learning Outcomes

- describe the concept of homeostasis and explain how it operates in the major physiological systems of the human body.
- demonstrate an understanding of the functioning of the major physiological systems of the human body at the cellular and systemic levels.
- explain the interactions between the major physiological systems of the body particularly as these interactions pertain to exercise and health
- correctly apply anatomical vocabulary in a physiological context.
- learn basic laboratory skills and apply these skills in the collection of physiological data (measuring, pipetting, handling of chemicals, data collection, data presentation, lab safety)
- utilize critical thinking to apply physiological concepts to specific problem solving situations in the context of scientific method

5. Basis of Student Assessment

Midterm 1	15%
Midterm 2	15%
Assignments and quizzes	20%
Journal articles	10%
Lab exam	10%
final exam	30%

6. Grading System

The following percentage conversion to letter grade will be used:

A+ = 90 - 100%	B = 73 - 76%	D = 50 - 59%
A = 85 - 89%	B- = 70 - 72%	F = 0 - 49%
A- = 80 - 84%	C+	= 65 - 69%
B+ = 77 - 79%	C = 60 - 64%	

7. Learning support and services for students

Learning Skills offers assistance to learners in a variety of ways.

http://www.camosun.bc.ca/learning-skills/

8. Student Responsibilities

- 1. Students are expected to hand in any required assignments on time. Assignments are due at the **beginning** of the class period on the due date. Assignments not handed in at the beginning of class will be considered late, for which there is a 10% penalty/day.
- 2. Attendance correlates highly with academic success. If unable to attend a lecture or lab session, the student is responsible for arranging with a classmate to obtain information such as notes, handouts and announcements.
- Examinations must be written as scheduled except in the case of illness or emergency. The student must notify the instructor in advance of the examination. Documentation acceptable to your instructor is required to schedule a make-up exam. <u>Vacation, work or travel plans do not constitute an emergency and</u> <u>exams will not be rescheduled</u>
- 4. Any evaluation of work for in-class assignments or lab assignments, reports and/or participation will not be given if a student is not present in class or lab.
- 5. Quizzes will be written at the beginning of class; if you are late for class you may not be allowed to write the quiz
- 6. Students are expected to work independently on assignments unless the evaluation is based on group effort. Please see ACADEMIC MISCONDUCT.

There is an **Academic Conduct Policy.** It is the student's responsibility to become familiar with the content of this policy. The policy is available in each School Administration Office, Registration, and on the College web site in the Policy Section, and in the **Camosun calendar**

7. Concerning spelling

Mastering the usage of anatomical and physiological terminology will be important to you for several reasons. Correct usage (pronunciation and spelling) will

- foster self confidence
- help to earn the respect of your professional colleagues
- reduce the chances of practical mistakes which may cause harm or embarrassment. (consider the difference between the terms **peroneal** and **perineal** or **ileum** and **ilium**)

You will be expected to use acceptable pronunciation and correct spelling for presentations, assignments and exams. **Penalties for spelling errors will be applied**. If writing is illegible, no marks will be given.

COURSE SCHEDULE - WINTER 2010

The following schedule is a <u>tentative</u> outline of lectures and laboratories. It is subject to change as the need arises. Changes will be announced in class.

WEEK/DATE	LECTURE TOPIC	TEXT CHAPTER	LAB
1. Jan 6-8	Intro to Cellular physiologyhomeostasisorganic macromolecules	Ch 1 Ch 2	NO LAB
2. Jan 11-15	 Intro to Cellular physiology (cont'd) cell membrane structure transport mechanisms enzymes 	Ch 3 Ch 4	Lab 1: Intro to Laboratory Science
3. Jan 18-22	 Digestive Physiology chemical digestion - enzymes absorption - chemicals, routes, locations neural and hormonal controls gastrointestinal function during exercise 	Ch 15	Lab 2: Intro to Chemical Concepts
4. Jan 25-29	Metabolism carbohydrate metabolism lipid and protein metabolism interconversion of molecules energy transfer in exercise absorptive and postabsorptive states, hormonal control 	Ch 3 Ch 15 Ch 16	Lab 3: Digestion of Organic Molecules
5. Feb1-5	MIDTERM 1 Neural Physiology • membrane potentials	(Ch 5 overview of cell signaling) Ch 6	Lab 4: Cellular Respiration and Glucose Monitoring
6. Feb 8-12	 Neural Physiology (cont'd) synapses and neurotransmitters neural integration reflex pathways 	Ch 6	Lab 5: Reflexes and cranial nerve tests
7. Feb 15-17 Feb 18-19	 Muscle Physiology neuromuscular junction sliding filament contraction theory READING BREAK 	Ch 9 Ch 10	(NO LABS)
8. Feb 22–25	 Muscle Physiology (cont'd) gross muscle physiology Cardiovascular Physiology ECG (action potentials) cardiac cycle and controls 	Ch 12	Lab 6: Sensory perception (Ch 7 overview)

9. Mar 1-5	Cardiovascular Physiology (cont'd)		Lab 7: Muscle
	capillary exchange	Ch 12	Physiology
10. Mar 8-12	Hematology		Lab 8:
	hematopolesis hemostasis	Ch 12	Cardiovascular Physiology
11. Mar 15-19	MIDTERM 2		
	Immunology / Defense Systems (if time allows)	Ch 18	Lab 9: Hematology and Immunology
12. Mar 22– 26	Specific Vs non-specific defense Respiratory Physiology		
	ventilation		
	 lung volume and capacities gas laws and diffusion 	Ch 13	Lab 10: Respiratory Physiology
	blood flow/gradients (O ₂ /CO ₂)		<u> </u>
13. Mar 29 - Apr 1	Renal Physiology		
	 renal anatomy review filtration/reabsorption /secretion 		
	fluid/electrolyte balance	Ch 14	Lab 11: Urinalysis
	acid/base balance		
April 2	GOOD FRIDAY		
14. April 5	EASTER MONDAY		
Apr 6-9	Renal Physiology (cont'd)		(Note: Monday lab students will
	Reproductive Physiology	Ch 17	need to write this
	 hormonal regulation of reproduction (if time allows) 		exam in one of the other lab sections)
Apr 12–20	FINAL EXAM (scheduled by registrar)
