

COURSE OUTLINE

The course description is online @ <http://camosun.ca/learn/calendar/current/web/geos.html>

GEOS 100 Physical Geology

- (4 credits) F, W (3,3,0,0)

The origin, composition, age, and processes of Earth are introduced. We study mineral and rock composition, and properties, rock-forming processes, geologic structures, earthquakes, and the plate tectonic model. We apply this knowledge to the geology of BC, Canada and current events. A weekend field trip is optional. Previous study of chemistry is an asset. (T)

Prerequisite(s): English 12 **or** assessment.

Ω Please note: the College electronically stores this outline for five (5) years only. It is **strongly recommended** you keep a copy of this outline with your academic records. You will need this outline for any future application/s for transfer credit/s to other colleges/universities.

1. Instructor Information

(a)	Instructor:	Dr. Tark Hamilton		
(b)	Office Hours:	9:30-10:20 T, F; 12:30-1:20 & 2:30-3:20 W,Th		
(c)	Location:	F344A		
(d)	Phone:	250-370-3331	Alternative Phone:	
(e)	Email:	hamilta@camosun.bc.ca Tuesday through Friday		
(f)	Website:	https://faculty.camosun.ca/tarkhamilton/ (under construction)		

2. Intended Learning Outcomes

Upon completion of this course the student will be able to:

1. Analyze minerals for common physical properties.
2. Identify common rock-forming minerals on the basis of their properties.
3. Infer how samples of some rocks have formed.
4. Infer the relationship of rock-forming processes to plate tectonics.
5. Describe and interpret textural features of rocks.
6. Describe compositional features of rocks.
7. Classify common rocks based on texture and composition.
8. Apply techniques to determine the chronological order of events in Earth's history.
9. Calculate absolute ages of Earth materials and events.
10. Identify common geologic structures and use symbols to represent such structures on maps.
11. Identify, describe and interpret geological structures in three dimensions.
12. Determine the relationship of geological structures and plate tectonic boundaries.
13. Determine the location of an earthquake from seismic data.
14. Use seismograms to infer relative earth movements on faults.
15. Relate the nature and distribution of major earth features such as mountains, volcanoes and earthquakes to plate tectonics.

3. Required Texts & Materials

Canadian Edition **Earth: An Introduction to Physical Geology**, E.J. Tarbuck, F.K. Lutgens, C.J. Tsujita & S. R. Hickock 2nd ed. Prentice Hall 2009. (Note: this is a new book with >40% new content and Canadian examples. I wrote the testbank and all of my test questions are based on this text. The 1st edition without Hickock is also adequate)

Laboratory Manual in Physical Geology, AGI, 8th edition of Busch and Tasa

Recommended reading of other geology texts, a geological glossary (dictionary), a mineral identification book and web based research, readings, real and virtual field trips. Ensure if you buy a used copy that all of the mineral and rock identification tables, and templates at the back and figures are still attached.

Earth: Animations Library on CD ROM (available in new packaged edition only)

(b) Other

Hand lens (needed in first 4 labs and field trips), protractor, drawing compass, coloured pencils (all needed for labs 4 onward for drawing and colouring).

2 half-day weekend field trips are required on a Saturday or a Sunday, announced 2 weeks in advance. These integrate your course learning with field observations.

4. Course Content and Schedule

Instruction 14 weeks

Classroom 3 hours 1:30-2:20: T, Th F310 & W F212

Lab 3 hours Fri – 1:30 PM -4:20 PM F300

(Lab attendance is mandatory, you must pass the lab to pass the course)

Labs are due at the beginning of the following lab the week following their issue. If you ask in advance you might be able to attend my other lab section Friday at 1:30-4:20 but be sure you ask as both sections are full and the 2 labs might be a week apart (either before or after this section). There are no make-up labs. Access to F300 is limited, use your lab time efficiently, most labs require 1 hour of reading prior to coming to the lab and 2-3 hours after the lab on your own to complete the exercises.

Local Field Trips during lab time & 2 weekend 1 day trips required 2 weeks notice. One will be on a Saturday, the other on a Sunday. Field trips count the same as 1 lab exercise towards your mark.

Labs, Tests & Midterm Schedule:

Period	Experiment	Pre-Lab Reading
Week 1- Jan 10	Field trip during lab period, don't be late	handout
Week 2- Jan 17	Lab 1: Units, Density and Isostasy	1-29 & Lab Form
Week 3- Jan 24	Lab 2 Plate Tectonics	30-46 & Lab Form
<u>Field Trip Saturday Jan 29: 11:00 AM to 5:30 PM</u>		
Week 4- Jan 31	Lab 3 Minerals	47-74 & Lab Form
Week 5- Feb 7	Finish Lab 3 Minerals & Lab 4 Rock Cycle	75-88 & Lab Form
Week 6- Feb 14	<u>Min Quiz</u> & Lab 5 Igneous & volc.rocks	89-108 & Lab Form
Week 7- Feb 21	Test 1 in Lab	Term test
Week 8- Feb 28	Lab 6 Sedimentary rocks & processes	109-132 & Lab Form
Week 9- Mar 7	Lab 7 Metamorphic rocks & Processes	133-150 & Lab Form
Week 10- Mar 14	Lab 8 Time, Relative & Absolute Dates	151-166 & Lab Form
Week 11- Mar 21	Midterm Test 2 in Lab & Lab 10 Structures	195-212 & Term test
Week 12- Mar 28	<u>Rock Quiz</u> Finish Lab 10 & Wapiti Pass Map & Models 1-6	
Week 13- Apr 4	Lab 16 Earthquakes & hazard	297-308 OYO!
Week 14- Apr 11	<u>Field Trip or Lab quiz 3 (Time, Structures.Quakes)</u>	

•Final exam to be scheduled by registrar during April 18-29, at the end of the course will cover **all** course & lab material.

Don't make travel arrangements for the final exam period other than the Easter long weekend. Only medical excuses will be allowed.

•At least a passing grade on lab marks must be achieved in order to write the final exam.

- You must pass both the lecture portion and the lab portion in order to pass the course
- Students are expected to come to lab on time – late arrivals will miss tests, quizzes or field trips as these begin promptly at the start of lab period. Prelab readings and assignments are due as you walk in the lab door. Without them you cannot do the lab. There is not time to read ~20 pages and to do the lab in the lab period.
- All lab reports must be stapled with your section number or lab day and time and your partner's name. All lab reports are joint projects of 2 people, these labs require partners for concepts, measurements, calculations and interpretations.

5. Basis of Student Assessment (Weighting)

(This section should be directly linked to the Intended Learning Outcomes.)

- (a) **Lab exercises** (due in lab at the beginning of the following lab period) Labs 3 and 10 count double as they are 2 week labs. There will not be time to work on old labs as there will always be new work assigned. **You must attend and pass the lab to pass this course.** The lab and field trips are where the scientific inquiry occurs.
- (b) **3 Lab tests and 2 Midterm exams (no late starts! 1st hour of lab period along with regular lab assignments in weeks 6, 12 and 14 covering: (mineral physical properties, formulas & identification), (rock identification and origin), and (Time, tectonic, structural and seismic problems) 5%, 5%, 5%. Labs and lab tests combine to 25% of course. Lab marks are relative to your peers and the overall point total. Most people's lab marks pull up their course mark.**
- (c) **Written exams** Wk7: **15%**, Wk11: **25%** covering lectures through week prior to test
- (d) **Weekly pop quizzes on assigned readings, new geological vocabulary terms and prior lecture notes may occur at beginning of each lab period or during Monday class.**
- (e) **Remedial short paper *if needed* on the science and technology in a pre-approved refereed geological journal article due wk8. Worth 5%**
- (f) **Final exam cumulative as scheduled 35%.**
- (g) **I have a 1 test forgiveness policy for those who improve their test scores. For example, if you do better on the final exam than a prior exam I will replace the lower mark and its proportion with the mark from your final exam.**

6. Grading System

Standard Grading System (GPA)

Percentage	Grade	Description	Grade Point Equivalency
90-100	A+		9
85-89	A		8
80-84	A-		7
77-79	B+		6
73-76	B		5
70-72	B-		4
65-69	C+		3
60-64	C		2
50-59	D	Minimum level of achievement for which credit is granted; a course with a "D" grade cannot be used as a prerequisite.	1
0-49	F	Minimum level has not been achieved.	0

Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading scheme being used in the course. See Grading Policy E-1.5 at camosun.ca for information on conversion to final grades, and for additional information on student record and transcript notations.

Temporary Grade	Description
I	<i>Incomplete:</i> A temporary grade assigned when the requirements of a course have not yet been completed due to hardship or extenuating circumstances, such as illness or death in the family.
IP	<i>In progress:</i> A temporary grade assigned for courses that, due to design may require a further enrollment in the same course. No more than two IP grades will be assigned for the same course. <i>(For these courses a final grade will be assigned to either the 3rd course attempt or at the point of course completion.)</i>
CW	<i>Compulsory Withdrawal:</i> A temporary grade assigned by a Dean when an instructor, after documenting the prescriptive strategies applied and consulting with peers, deems that a student is unsafe to self or others and must be removed from the lab, practicum, worksite, or field placement.

7. Recommended Materials or Services to Assist Students to Succeed Throughout the Course

LEARNING SUPPORT AND SERVICES FOR STUDENTS

There are a variety of services available for students to assist them throughout their learning. This information is available in the College calendar, at Student Services, or the College web site at camosun.ca.

STUDENT CONDUCT POLICY

There is a Student Conduct Policy **which includes plagiarism**. It is the student's responsibility to become familiar with the content of this policy. The policy is available in each School Administration Office, at Student Services, and the College web site in the Policy Section.

No eating or drinking allowed in laboratories.
