

School of Arts & Science MATHEMATICS DEPARTMENT

MATH 163 X02 Mathematics For Computing 2012 Q1

COURSE OUTLINE

The Approved Course Description is available on the web @

http://camosun.ca/learn/calendar/current/web/math.html#MATH163

* Please note: this outline will be electronically stored for five (5) years only. It is strongly recommended students keep this outline for your records.

1. Instructor Information

(a)	Instructor:	Leah Howard	
(b)	Office Hours:	11:30-12:20 daily	
(c)	Location:	CBA 151	
(d)	Phone:	(250) 370-4490	Alternative Phone:
(e)	Email:	howardl@camosun.bc.ca	
(f)	Website:	www.leahhoward.com	

2. Intended Learning Outcomes

Upon completion of this course the student will be able to:

- Use truth tables to define the logical connectives "and", "or", and "not." Determine whether two logical
 expressions are equivalent using truth tables.
- 2. State the laws of logic and use them to simplify logical expressions and prove logical equivalence. State the laws of Boolean algebra and use them to simplify Boolean expressions. Use the relationships between the laws of logic, the algebra of sets, and Boolean algebra to define membership tables for sets and draw the associated Venn diagrams.
- 3. Use the conditional and related logical forms to translate English expressions into logical symbols.
- 4. Determine the appropriate commands for querying a database using the fundamental operations of relational algebra.
- 5. Solve trigonometry equations and problems involving right triangles. Solve problems and equations involving trigonometric functions of any angle.
- 6. Simplify exponential and logarithmic expressions. Sketch graphs of desired exponential and logarithmic functions. Solve equations and word problems involving exponents and logarithms, specifically problems involving exponential growth and decay.
- 7. Analyse and calculate general formulas for sequences and series, with emphasis on recursive definitions. Evaluate sums for arithmetic and geometric series.
- 8. Represent a data set using a stem-and-leaf plot, a histogram, and a pie chart.
- 9. Calculate probabilities for events using counting techniques and/or rules for conditional probability.
- Evaluate the mean, standard deviation (sample and population), median, and mode for a discrete data set.
 Perform calculations involving the mean and standard deviation for both the binomial and normal distributions.

3. Required Materials

- (a) Texts All course materials are available on the course website.
- (b) Calculator Only scientific calculators (non-graphing, non-programmable) are permitted. Calculators that manipulate radicals in exact form (eq. the Casio FX-300ES) are not allowed.

The recommended calculator is the Sharp EL-531.

4. Course Content

Logic

Section 1.1: Sets Section 1.2: Subsets

Section 1.3: Operations on Sets Section 1.4: Venn Diagrams Section 1.5: Intro to Logic

Section 1.6: Logical Equivalence

Section 1.7: Algebra of Sets Section 1.8: Boolean Algebra Section 1.9: Laws of Logic

Section 1.10: More Laws of Logic Section 1.11: The Conditional Section 1.12: The Biconditional

Relational Algebra

Section 2.1: Relations

Section 2.2: Relational Algebra

Sequences & Series

Supplement: Review of Solving Linear Systems

Section 3.1: Sequences and Series Section 3.2: Arithmetic Series Section 3.3: Geometric Series

Trigonometry

Supplement: Review of Radicals

Section 4.1: Trigonometric Functions of Acute Angles

Section 4.2: Solving Right Triangles

Section 4.3: Applications in Computer Graphics

Section 4.4: Radians and Trig Functions of Any Angle

Exponents and Logs

Supplement: Review of Exponents
Section 5.1: Exponential Functions
Section 5.2: Logarithmic Functions
Section 5.3: Properties of Logs
Section 5.4: Solving Equations
Section 5.5: Applications

Statistics and Probability Topics

Section 6.1: Counting Techniques

Section 6.2: Combinations and Permutations

Section 6.3: Probability

Section 6.4: Measures of Centre and of Variability

Section 6.5: Measures of Relative Standing

5. Basis of Student Assessment (Weighting)

Grade Calculation: The final grade will be calculated according to the following breakdown:

Tests: 40% Assignments: 10% Final Exam: 50%

If your final exam grade is higher than your term work grade and your term work is **50% or higher**, then your final exam grade will count as 100% of your final grade.

Tests:

There will be three term tests. If a student is absent for one of these tests for any reason, the student will be given the opportunity to write a make-up test on the last day of classes.

Students who write all three tests may rewrite one of the three tests on the last day of classes, with the following two conditions: the student must notify the instructor verbally or by email at least 3 days in advance of their intention to write, and the mark from the rewrite test will replace the original mark **whether or not the new mark is better** than the old one.

TENTATIVE TEST DATES: Fri. Oct. 19, Fri. Nov. 9, Fri. Nov. 30

Final Exam:

The final exam will cover the entire course and will be 3 hours long. As stated in the current college calendar, "students are expected to write tests and final examinations at the scheduled time and place." Exceptions will only be considered due to **emergency** circumstances as outlined in the calendar. The calendar specifically states that "holidays or scheduled flights are not considered to be emergencies."

Assignments:

The lowest assignment grade will be dropped when calculating the average of your assignments. This allows a student to miss any one assignment for any reason, including illness, without penalty.

Late Policy: Assignments that are late will be given a 25% penalty if the solutions have not yet been posted to the course website. Once the solutions have been posted, late assignments will not be accepted.

Collaboration Policy: Student are encouraged to collaborate (work together) on assignments. However, you must be prepared to answer similar questions on your own for the quizzes, so it is vital that you yourself understand all of the assigned questions and work that you turn in.

7. Grading System

Standard Grading System (GPA)

Percentage	Grade	Description	Grade Point Equivalency
90-100	A+		9
85-89	Α		8
80-84	A-		7
77-79	B+		6
73-76	В		5
70-72	B-		4
65-69	C+		3
60-64	С		2
50-59	D	Minimum level of achievement for which credit is granted; a course with a "D" grade cannot be used as a prerequisite.	1
0-49	F	Minimum level has not been achieved.	0

Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading scheme being used in the course. See Grading Policy E-1.5 at **camosun.ca** for information on conversion to final grades, and for additional information on student record and transcript notations.

Temporary Grade	Description
I	Incomplete: A temporary grade assigned when the requirements of a course have not yet been completed due to hardship or extenuating circumstances, such as illness or death in the family.
IP	In progress: A temporary grade assigned for courses that, due to design may require a further enrollment in the same course. No more than two IP grades will be assigned for the same course. (For these courses a final grade will be assigned to either the 3 rd course attempt or at the point of course completion.)
cw	Compulsory Withdrawal: A temporary grade assigned by a Dean when an instructor, after documenting the prescriptive strategies applied and consulting with peers, deems that a student is unsafe to self or others and must be removed from the lab, practicum, worksite, or field placement.

8. Recommended Materials or Services to Assist Students to Succeed Throughout the Course LEARNING SUPPORT AND SERVICES FOR STUDENTS

There are a variety of services available for students to assist them throughout their learning. This information is available in the College calendar, at Student Services or the College web site at camosun.ca.

STUDENT CONDUCT POLICY

There is a Student Conduct Policy **which includes plagiarism**. It is the student's responsibility to become familiar with the content of this policy. The policy is available in each School Administration Office, at Student Services and on the College web site in the Policy Section.

MATH LAB: TEC 142. This drop-in centre is a place to work on math homework and to seek help from the tutor on staff.
