

COURSE OUTLINE

The course description is online @ http://camosun.ca/learn/calendar/current/web/math.html

 Ω Please note: the College electronically stores this outline for five (5) years only. It is **strongly recommended** you keep a copy of this outline with your academic records. You will need this outline for any future application/s for transfer credit/s to other colleges/universities.

1. Instructor Information

| (a) | Instructor: | Leah Howard |
|-----|---------------|--------------------------|
| (b) | Office Hours: | Monday-Friday 11:30-1:20 |
| (C) | Location: | CBA 151 |
| (d) | Phone: | 250-370-4490 |
| (e) | Email: | howardl@camosun.bc.ca |
| (f) | Website: | www.leahhoward.com |

2. Intended Learning Outcomes

(<u>No</u> changes are to be made to these Intended Learning Outcomes as approved by the Education Council of Camosun College.)

Upon completion of this course the student will be able to:

- 1. Use techniques from combinatorics to solve counting problems. Calculate probabilities using simple events, counting techniques, and the axioms and properties of probability and conditional probability. Define and identify independent events, mutually exclusive events, and complements. Calculate probabilities using Bayes' theorem.
- 2. Describe a discrete data set graphically via a stem-and-leaf display, histogram, relative frequency polygon, and box plot.
- Describe a discrete data set numerically by calculating the mean, mode, median, sample and population variance, and sample and population standard deviation. Make predictions about the distribution of a data set using the Empirical Rule and Tchebyshev's Theorem.
- 4. Perform calculations and solve problems involving probability distributions of discrete random variables, including binomial, Poisson, hypergeometric, and negative binomial distributions. Calculate the expected value of a random variable. Perform calculations involving probability distributions of continuous random variables, including normal and gamma distributions. Use the Standard Normal Table to solve problems involving normal distributions.
- 5. Describe and identify sampling plans. Calculate sampling distributions for sample mean and sample proportion. Interpret control charts for sample mean and proportion.
- 6. For large samples, calculate point estimates and confidence intervals for population means and proportions. Perform large-sample tests of hypothesis for population means and differences in means and for population proportions and differences in proportions.
- 7. For small samples, use the student's t distribution to calculate point estimates and confidence intervals and for hypothesis testing. For small samples, use the chi-square probability distribution to construct confidence intervals and perform hypothesis testing on the population variance.

8. For a bivariate data set, determine the regression (least squares) line, and calculate and interpret the coefficients of correlation and determination. Use least squares to fit quadratic, cubic, and exponential curves to a given bivariate data set.

3. Materials

REQUIRED: The Sharp EL-520 Calculator

4. Course Content and Schedule

CORE TOPICS: Describing Data with Graphs Describing Data with Numerical Measures Correlation and the Regression Line Probability Discrete Probability Distributions Continuous Probability Distributions The Normal Distribution The Central Limit Theorem Large Sample Inference Student's t-Distribution The Chi-Square Distribution Small Sample Inference Goodness-of-Fit

5. Basis of Student Assessment (Weighting)

To get a C or higher in the course, you must pass the final exam (50% or higher) **and** have an overall average of at least 60% computed from:

(a) Three assignments (10% total)

DUE: Friday July 19, Friday August 23, Tuesday September 3

(b) Two In-Class Tests (20% each)

ON: Tuesday July 23, Tuesday August 27

(c) Comprehensive Final Exam (50%)

Exception: if your term mark is at least 50% **and** you earned at least 60% on the final exam, then you will receive a C or higher in the course.

In the event of a missed test, your final exam will be weighted to 70% of your final grade.

Exam Week is Monday September 9-Sunday September 15 inclusive.

6. Grading System

(<u>No</u> changes are to be made to this section unless the Approved Course Description has been forwarded through the Education Council of Camosun College for approval.)

Standard Grading System (GPA)

| Percentage | Grade | Description | Grade Point Equivalency |
|------------|-------|-------------|----------------------------|
| 90-100 | A+ | | 9 |
| 85-89 | A | | 8 |
| 80-84 | A- | | 7 |
| 77-79 | B+ | | 6 |
| 73-76 | В | | 5 |
| 70-72 | B- | | 4 |
| 65-69 | C+ | | 3 |
| 60-64 | С | | 2 |

| 50-59 | D | Minimum level of achievement for which credit is granted; a course with a "D" grade cannot be used as a prerequisite. | 1 |
|-------|---|---|---|
| 0-49 | F | Minimum level has not been achieved. | 0 |

Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading scheme being used in the course. See Grading Policy E-1.5 at **camosun.ca** for information on conversion to final grades, and for additional information on student record and transcript notations.

| Temporary Grade | Description |
|--------------------|---|
| I | <i>Incomplete</i> : A temporary grade assigned when the requirements of a course have not yet been completed due to hardship or extenuating circumstances, such as illness or death in the family. |
| IP | <i>In progress</i> : A temporary grade assigned for courses that, due to design may require a further enrollment in the same course. No more than two IP grades will be assigned for the same course. (For these courses a final grade will be assigned to either the 3 rd course attempt or at the point of course completion.) |
| cw | <i>Compulsory Withdrawal:</i> A temporary grade assigned by a Dean when an instructor, after documenting the prescriptive strategies applied and consulting with peers, deems that a student is unsafe to self or others and must be removed from the lab, practicum, worksite, or field placement. |

7. Recommended Materials or Services to Assist Students to Succeed Throughout the Course

LEARNING SUPPORT AND SERVICES FOR STUDENTS

There are a variety of services available for students to assist them throughout their learning. This information is available in the College calendar, at Student Services, or the College web site at <u>camosun.ca</u>.

STUDENT CONDUCT POLICY

There is a Student Conduct Policy **which includes plagiarism**. It is the student's responsibility to become familiar with the content of this policy. The policy is available in each School Administration Office, at Student Services, and the College web site in the Policy Section.

MATH LAB:

You can get free math help in the Math Lab, located in TEC 142. The tutor's hours are posted on the door of the Math Lab.
