**February 16: 15%**

- Based on material covered to date

**c) Preliminary bibliography and Essay proposal**

**February 18: 10%**

Read Assignment (e) on pages 8-9

1) Proposal:

In 1-2 pages:

- Describe what your topic will be.
- Why did you choose this topic? Why did you choose this project, this supporter, and this opponent?
- What is the objective of the assignment, what do you intend to explore/find out?
- How will you approach your research, what are some of the sources you intend to use (in general terms)?

2) Provide, in full Chicago Manual of Style (how-to at: <http://camosun.ca.libguides.com/chicago>)

- 3 primary sources

1. **Primary sources** are the basic materials for conducting original research in a given discipline. They include documents such as letters, diaries, autobiographies, newspaper and magazine articles, speeches, eyewitness accounts, photographs and sketches, and census data. Compelling evidence is needed in order to substantiate any claim. Primary sources constitute the best **evidence**. Original research is only made possible by collection, discovery, and recovery of primary documents and materials.

- 2 secondary sources

1. **Secondary sources** are books and articles and documentaries that draw on primary sources and interpret them. When you are first researching a topic of interest, the fastest way to come to an understanding of your subject is to read secondary sources. Critical reading of these materials will also give you a sense of how other researchers have approached your research topic, which may give direction to your own argument—either toward or away from established perspectives or conclusions. Academic writing will require you to consult secondary sources to support and direct your own analysis. Most important to the student researcher, good secondary sources will **lead you** to the primary documents and resources noted in a bibliography or footnote. (source: RMC POE 206 CD)

**d)Test # 2**

**March 9: 10%**

- Based on material covered since last test

**e)Essay**

**March 16: 25%**

Then, explain:

- The project
- Which government(s) has the authority to decide whether the project proceeds or not
- Explain who the supporter is
- Explain who the opponent is
- Explain the rationale for the support
- Explain the rationale for the opposition
- What are the opportunities each has to present their position
- Analyze whether or not these positions can be reconciled

**f)Presentation (individual)**

**March 30, April 1 or 8: 5%**

Everyone will provide a 5 minute presentation to the class about their paper.

- Explain your topic,
- What were you were trying to determine
- How did you approach your research
- What did you conclude about the opposing views regarding the proposal
- Explain any points of interest regarding the **process of undertaking research** for the paper

You will have to time your presentation carefully in order that everyone can complete this assignment. You will be graded on content (**all** points above addressed), timing, and speaking (good clarity and volume).

**g)Final Exam**

**TBA**

**20%**

Note that only one of these assignments is group work. The others are each to be done individually. You are encouraged to ask librarians for help with your research.
