Intended Learning Outcomes

Basic learning principles are applied to everyday problems. How to deal effectively with such diverse situations as bedwetting, tantrums, non-compliance, stealing and lying in children; adult problems such as obesity, smoking, incompatibility in marriage, headaches and phobias are considered. Learning is achieved through group discussion and creative role-play situations.

Upon completion of this course the student will be able to:

1. Define and diagram procedures used in behaviour analysis.
2. Explain the advantages and/or disadvantages of choosing a specific behavioural procedure when given a case example of behaviour.
3. Describe ethical considerations when choosing to use any behaviour modification procedure.
4. Explain single-subject research design and how the various methodologies meet or fail to meet the rules of scientific inquiry
5. Analyze and describe the behavioural procedures used in a variety of research and applied examples.
6. Write an APA style research paper reviewing current research in behaviour analysis.
