

COURSE OUTLINE

The course description is online @ <http://camosun.ca/learn/calendar/current/web/biol.html>

✦ *Please note: the College electronically stores this outline for five (5) years only. It is **strongly recommended** you keep a copy of this outline with your academic records. You will need this outline for any future application/s for transfer credit/s to other colleges/universities.*

1. Instructor Information

Instructor:	Sarah Cockburn
Office Hours:	By Appointment (see below)
Location:	F352
Phone:	250-370-3925
Email:	cockburns@camosun.bc.ca
Course Website:	http://online.camosun.ca/ (D2L)

Important Note: Since this lecture occurs off campus and during school hours, daytime drop-in office hours will not be held. I am happy to answer any questions during class and lab time, and I will also usually be available before your lab section in the evening. If you would like to meet to discuss anything pertaining to the course, simply arrange an appointment by e-mail and I'll be very pleased to meet with you at a mutually convenient time.

2. Intended Learning Outcomes

Upon completion of this course, the student will be able to:

1. Describe the concept of homeostasis.
2. Explain how basic physicochemical changes can impact cell function.
3. Work in a culture of scientific endeavor and use critical thinking skills.
4. Identify the critical roles played by water in the maintenance of life on earth.
5. Explain the structures and roles of biological macromolecules, particularly carbohydrates, proteins and lipids.
6. Describe the complexity and diversity of cellular ultrastructure and the functions of significant cellular organelles, in particular chloroplasts, mitochondria, ribosomes, Golgi apparatus, cilia and flagellae.
7. Describe basic metabolism and energy producing pathways within the cell.
8. Explain the concept of the gene in the contexts of both Mendelian inheritance as well as the biochemical expression of genetic information.
9. Relate the structure of nucleic acids to the storage and replication of genetic information.
10. Explain the mechanisms used to regulate and translate genetic information into the assembly of functional proteins.
11. Describe the interactions between the environment and long-term changes in genetic information, particularly in consideration to neoplasia.
12. Describe the anatomy of the human digestive, cardiovascular and excretory systems and explain how the physiology of these organ systems is related to organization at the molecular and cellular level.
13. Describe the structure and explain the functions of the human immune system. Apply this knowledge to immune dysfunction, particularly allergies and AIDS.

3. Required Materials

(a) **Lab Manual:** Biology 103 Lab Manual (Fall 2014), Camosun College.

Lecture Outlines: Lectures will be delivered in a PowerPoint format. PowerPoint slides will be made available on the Biology 103 D2L website. These may be used or printed at the student's discretion to help follow the lectures.

(b) Optional Materials: **Textbook:** Campbell, 2013. **Essential Biology with Physiology**. 4th edition. Pearson.

4. Course Content and Schedule

Lectures: Monday. 9:51 PM – 12:16 PM, EMCS Sooke

Friday 9:45-11:32 AM – 5:20 PM (see note), EMCS Sooke

Important Note: Lectures will not be all Fridays, please see Course Schedule for details

Lab: Thurs. 6:30 PM – 9:20 PM, Camosun College Lansdowne F244

OR

Thurs. 4:00 PM – 6:50 PM, EMCS Sooke

5. Basis of Student Assessment (Weighting)

Lab Assignments/quizzes: 7.5%

Lecture Assignments 7.5%

Exams:

Midterm 1 15%

Midterm 2 15%

Lab Exam 1 15%

Lab Exam 2 15%

Final Exam 25%

Midterms I and II, as well as the lab exams, will be unit exams.

The final lecture exam will be cumulative.

Please bring a pen *and* pencil to all exams

6. Grading System

Standard Grading System (GPA)

Percentage	Grade	Description	Grade Point Equivalency
90-100	A+		9
85-89	A		8
80-84	A-		7
77-79	B+		6
73-76	B		5
70-72	B-		4
65-69	C+		3
60-64	C		2
50-59	D	Minimum level of achievement for which credit is granted; a course with a "D" grade cannot be used as a prerequisite.	1
0-49	F	Minimum level has not been achieved.	0

Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading scheme being used in the course. See Grading Policy E-1.5 at camosun.ca for information on conversion to final grades, and for additional information on student record and transcript notations.

Temporary Grade	Description
I	<i>Incomplete:</i> A temporary grade assigned when the requirements of a course have not yet been completed due to hardship or extenuating circumstances, such as illness or death in the family.
IP	<i>In progress:</i> A temporary grade assigned for courses that, due to design may require a further enrollment in the same course. No more than two IP grades will be assigned for the same course. <i>(For these courses a final grade will be assigned to either the 3rd course attempt or at the point of course completion.)</i>
CW	<i>Compulsory Withdrawal:</i> A temporary grade assigned by a Dean when an instructor, after documenting the prescriptive strategies applied and consulting with peers, deems that a student is unsafe to self or others and must be removed from the lab, practicum, worksite, or field placement.

7. Recommended Materials or Services to Assist Students to Succeed Throughout the Course

LEARNING SUPPORT AND SERVICES FOR STUDENTS

There are a variety of services available for students to assist them throughout their learning. This information is available in the College calendar, at Student Services, or the College web site at camosun.ca.

STUDENT CONDUCT POLICY

There is a Student Conduct Policy **which includes plagiarism**. It is the student's responsibility to become familiar with the content of this policy. The policy is available in each School Administration Office, at Student Services, and the College web site in the Policy Section.

Plagiarism

Plagiarizing is appropriating the work of another or parts or passages of another's writing (including the ideas or language) and passing them off as the product of one's own mind or manual skill. **Plagiarism will not be tolerated.** Plagiarism, **including the copying of any part of assignments or lab assignments**, is a serious offence and is considered to be academic misconduct. In some cases, the lab instructor may prefer a lab assignment to be written as a group. In such cases, handing in one assignment for the group will be acceptable. Otherwise, lab assignments handed in by individuals are expected to be individually prepared.

Cheating

A student caught cheating on an exam will forfeit all credit for that exam and perhaps for the course. Cheating is a serious offence and is considered to be academic misconduct. **Cheating includes, but is not limited to, using unauthorized materials in a quiz/exam and providing information to another person regarding exam content.**

The consequences for cheating and plagiarism are outlined by Camosun College policies (see <http://camosun.ca/about/policies/education-academic/e-2-student-services-&-support/e-2.5.pdf> and <http://camosun.ca/about/policies/education-academic/e-2-student-services-&-support/e-2.5.1.pdf>) and may be severe.

Lab Safety

Under **NO** circumstances will students ingest food or drink in the lab. Taking oral medication or applying makeup or lip balm in the lab is also prohibited. You may leave the lab at a convenient time if you are thirsty, need a snack or require medication. For safety reasons students are **required** to wear closed shoes and pants in all lab times. Flip flops, sandals or shoes with holes are not acceptable.

Failure to adhere to the lab safety principles will result in the inability to enter the lab, or expulsion from the lab, and the subsequent **loss of credit** for that lab, including any pre-lab assessment credit.

Laboratory Attendance

A **1% final grade penalty** applies to any unexcused absence from lab. Frequent lates may count as an absence. Should you miss roll call at the beginning of lab, please identify yourself to the instructor as "late" or you may remain marked "absent". Lab assignments can only be handed in for labs actually attended.

It is *absolutely* necessary to read and mentally work through each exercise before coming to lab. Otherwise you may not be able to finish on time, annoy your lab partner, or flunk a pre-lab pop quiz. Please also come prepared with a pencil and a few sheets of unlined and graph paper, in case drawings are required.

Missed Exams and Assessments

Quizzes and the exams must be written at the scheduled times. Under no circumstances will a make-up exam be administered. However, it is understood that emergency circumstances occur (e.g. illness or emergency in the immediate family); for such circumstances accommodation may be offered at the discretion of the instructor, provided (a) the instructor is notified in advance of the exam (not after) and (b) the student provides documented evidence of the circumstance (i.e. medical certificate). The accommodation will be in the form of a make-up exam or adjusting the weighting of the final lecture exam to make up the missing marks, at the discretion of the instructor.

Please note: holidays or scheduled flights are not considered to be emergencies!

Late Penalties

Unless otherwise stated, all assignments are due at the beginning of the lab/class of the due date. There is a 10% /day late penalty (including weekend days). The format is expected to be professional, i.e. a neat, legible, clean copy. "Rough" drafts risk rejection and a subsequent late penalty. If the assignment is more than one page, separate pages **must be stapled** before you come to class.

Study Habits:

You will probably find Biology 103 not very difficult, but surprisingly labor-intensive. Good (and regular!!) study habits are required to do well in this course. You should plan on a *minimum* of 6 hours outside of scheduled class time for the completion of assignments and for general studying. Joining a study group can help this make more fun.

Lecture notes will be provided in point form. These should be used as a study guide, not as your sole source of information! You will need to write down additional key words for examples and explanations given during lecture. It is also recommended practice to transcribe these notes into a study-friendly format after each lecture, incorporating additional information from your textbook. Study these notes before the next class to prepare yourself for new material, which will often build on previously covered material.

Please take advantage of office hours if you need extra clarification and help, or simply would like to discuss a topic a little further.

Biology 103 – W2016 - Course Schedule (Note: Scheduled dates are subject to change) Topics may be added or deleted depending upon time constraints

Wk	Day	Date	Lecture Topic
1	Fri	05-Feb	Course Introduction Scientific Method Biochemistry Basics Water & pH
2	Fri	12-Feb	Organic Macromolecules Cell Biology
3	Mon	15-Feb	Energetics/ Cell Membranes/ transport Enzymes
4	Mon	22-Feb	Cellular Respiration
5	Mon	29-Feb	Cellular Respiration Cell Division / Mitosis
6	Mon	07-Mar	Cell Division / Mitosis
6	Fri	11-Mar	Midterm 1
7	Mon	14-Mar	No Classes (Spring Break)
8	Mon	21-Mar	
9	Mon	28-Mar	No Class (Easter Monday)
9	Thurs	31-Mar	Meiosis Mendelian Genetics/Sex-linked traits
10	Mon	04-Apr	No Class (Pro-D day)
11	Mon	11-Apr	Inheritance Patterns DNA Replication
11	Thurs	14-Apr	DNA Replication Protein Synthesis
12	Mon	18-Apr	Protein Synthesis/Transcription/ Translation/Mutations
12	Fri	22-Apr	Midterm 2
13	Mon	25-Apr	Gene Expression/Control Cancer
14	Mon	02-May	Homeostasis Excretion
15	Mon	09-May	Nutrition Digestion
16	Mon	16-May	Circulation Respiration
17	Mon	23-May	No Class (Victoria Day)
17	Fri	27-May	Immune System
18	Mon	30-May	Catch-up / Review / Extra Topics
18	Fri	03-June	Final Exam (3hrs)

Biology 103 – W2016 - Lab Schedule (Note: Scheduled dates are subject to change)

Wk	Day	Date	Lab	Lab Activity
1	Thurs	04-Feb	-	No Lab
2	Thurs	11-Feb	Lab 1 (Sooke)	Measurements & Equipment
3	Thurs	18-Feb	Lab 2 (Sooke)	Microscopes & Cells
4	Thurs	25-Feb	Lab 3 (Camosun)	Organic Macromolecules
5	Thurs	03-Mar	Lab 4 (Camosun)	Diffusion & Osmosis
6	Thurs	10-Mar	Lab 5 (Camosun)	Enzymes
7	Thurs	17-Mar	-	No Lab (Spring Break)
8	Thurs	24-Mar		
9	Thurs	31-Mar	Lecture (Sooke)	
10	Thurs	07-Apr	Lab Exam (Camosun)	LAB EXAM 1
11	Thurs	14-Apr	Lecture (Sooke)	
12	Thurs	21-Apr	Lab 6 (Sooke)	Mitosis & Meiosis
13	Thurs	28-Apr	Lab 7 (Sooke)	Inheritance of Human Traits
14	Thurs	05-May	Lab 8 (Sooke)	CATLAB: Inheritance Patterns
15	Thurs	12-May	Lab 9 (Sooke)	Nutrition
16	Thurs	19-May	Lab 10 (Camosun)	Human Anatomy
17	Thurs	26-May	Lab Exam (Camosun)	LAB EXAM 2
