

**School of Arts & Science
PHYSICS DEPARTMENT**

**PHYS 160-
Biomechanics of Sport
Winter 2016**

COURSE OUTLINE

The Approved Course Description is available on the web @
<http://camosun.ca/learn/calendar/current/web/phys.html>

Ω Please note: this outline will be electronically stored for five (5) years only.
It is strongly recommended students keep this outline for your records.

1. Instructor Information

(a)	Instructor:	Dr. Julie Alexander		
(b)	Office Hours:	T – 9:30, W – 12:30-2:30, F – 9:30		
(c)	Location:	Tech 220		
(d)	Phone:	370-4437	Alternative Phone:	
(e)	Email:	jalex@camosun.bc.ca		
(f)	Website:	http://web.uvic.ca/~jalexndr		

2. Intended Learning Outcomes

Upon completion of this course the student will be able to:

1. Answer, in written form, brief conceptual questions on the scope of biomechanics.
2. Solve technical problems:
 - involving units of scientific measurement, derived S.I. units, unit conversions.
 - involving forces in one dimension.
 - of force and linear kinematics with constant acceleration.
 - of momentum and impulse in one dimension.
 - of mechanical work, energy and power.
 - involving rotational quantities and kinematic relationships.
 - of torque, rotational kinematics, and angular momentum.
 - involving centre of mass.
 - of fluid buoyancy, lift and drag.
 - demonstrate proficiency in qualitative and quantitative biomechanical analysis of a sport activity.

3. Required Materials

- (a) Texts Biomechanics of Sport and Exercise, 3rd edition, McGinnis, P.M.
- (b) Other Physics 160 Laboratory Manual
Physics 160 Biomechanics Problem Book
Scientific calculator

4. Course Content and Schedule

Class times M, W, – 11:30-12:30, T – 8:30- 9:30, F – 11:00-12:00
Lab Th – 3:00-5:00

5. Basis of Student Assessment (Weighting)

There will be three 50 minute term tests on the following dates:
Tuesday Jan 16, Friday Feb 12 and Tuesday Mar 15.

The standard mark distribution for this course is as follows:

Three term tests	40%
Student Presentation and labs	10%
Final Exam (3 hours)	50%

DEPARTMENT POLICIES REGARDING TESTING:

1. Students must write quizzes, tests, midterm tests, etc., on the date and time assigned by the instructor. Missed exams normally receive a zero grade. In exceptional circumstances such as medical issues or a documented illness, a make-up exam may be given or the test may be waived at the discretion of the instructor. The instructor should be notified prior to the exam.
2. The final exam will cover the entire course and will be 3 hours long. As stated in the current college calendar (p. 39) “students are expected to write all term tests and final exams at the scheduled time and place.” Exceptions will only be considered for emergency circumstances as outlined in the calendar. Excursions, holidays, or scheduled travel flights are not accepted.

DEPARTMENT POLICIES REGARDING LABS:

1. Lab exercises will be done on a bi-weekly basis during the scheduled lab period. Attendance is mandatory and you will be required to “sign in” at the beginning of each one. As you complete the exercise your instructor will discuss your results with you and mark your work.
2. All assigned laboratory exercises and reports must be completed with an overall grade of 60% in order to obtain credit for this course. Attendance is required for all lab exercises at the scheduled times. A lab may be made up at a later time only in the case of documented illness or other extenuating circumstances.
3. At the discretion of the instructor, a student who is repeating this Physics course may not be required to complete the laboratory exercises a second time if an average lab grade of 70% or better was obtained.

STUDY TIME:

It is recommended that between 5 and 10 hours per week be spent studying for this course outside of class time.

6. Grading System

Standard Grading System (GPA)

Percentage	Grade	Description	Grade Point Equivalency
90-100	A+		9
85-89	A		8
80-84	A-		7
77-79	B+		6
73-76	B		5
70-72	B-		4
65-69	C+		3
60-64	C		2
50-59	D	Minimum level of achievement for which credit is granted; a course with a "D" grade cannot be used as a prerequisite.	1
0-49	F	Minimum level has not been achieved.	0

Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading scheme being used in the course. See Grading Policy E-1.5 at camosun.ca for information on conversion to final grades, and for additional information on student record and transcript notations.

Temporary Grade	Description
I	<i>Incomplete:</i> A temporary grade assigned when the requirements of a course have not yet been completed due to hardship or extenuating circumstances, such as illness or death in the family.
IP	<i>In progress:</i> A temporary grade assigned for courses that, due to design may require a further enrollment in the same course. No more than two IP grades will be assigned for the same course. (For these courses a final grade will be assigned to either the 3 rd course attempt or at the point of course completion.)
CW	<i>Compulsory Withdrawal:</i> A temporary grade assigned by a Dean when an instructor, after documenting the prescriptive strategies applied and consulting with peers, deems that a student is unsafe to self or others and must be removed from the lab, practicum, worksite, or field placement.

7. Recommended Materials or Services to Assist Students to Succeed Throughout the Course

LEARNING SUPPORT AND SERVICES FOR STUDENTS

There are a variety of services available for students to assist them throughout their learning. This information is available in the College calendar, at Student Services or the College web site at camosun.ca.

STUDENT CONDUCT POLICY

There is a Student Conduct Policy **which includes plagiarism**. It is the student's responsibility to become familiar with the content of this policy. The policy is available in each School Administration Office, at Student Services and on the College web site in the Policy Section.

OUTLINE

Part I Introduction, Forces and Human Motion

1. Introduction to Biomechanics

- 1.1 The study of Biomechanics
- 1.2 Definitions and history

2. Terminology for Biomechanics in Sport and Exercise

- 2.1 The skeletal system and body segments
- 2.2 Bones and joints
- 2.3 Muscles
- 2.4 Anatomical system for describing limb movements- direction, planes, and axes of motion.
- 2.5 Joint actions

3. Fundamentals for Studying Mechanics

- 3.1 Measurement, units, basic dimensions and fundamental quantities
- 3.2 Accuracy and calculation
- 3.3 Graphical analysis – plotting graphs, fitting curves to the data, analysis and interpretation

4. Forces

- 4.1 The organization of mechanics
- 4.2 Newton's laws of motion
- 4.3 Defining forces – magnitude and direction
- 4.4 Types of forces
- 4.5 Addition of forces – resultant force
- 4.6 Resolution of forces
- 4.7 Equilibrium

5. Linear Kinematics – Describing Objects in Linear Motion

- 5.1 Motion and definitions
- 5.2 Linear kinematics
- 5.3 Uniform acceleration and projectile motion

6. Linear Kinetics – The Causes of Linear Motion

- 6.1 Newton's First Law and inertia
- 6.2 Newton's Second Law and acceleration
- 6.3 The concepts of impulse and momentum
- 6.4 Newton's Third Law – Action and reaction forces
- 6.5 Newton's Law of Universal Gravitation

7. **Work, Energy and Power**

7.1 Definition of Work

7.2 Energy - Kinetic and Potential

7.3 Work and energy - The Work-Energy Theorem, Conservation of Energy

7.4 Power

Part II Angular Motion and Fluid Mechanics

8. **Torques – Maintaining Equilibrium or Changing Rotational Motion**

8.1 Defining torques – Forces and lever arms

8.2 Equilibrium

8.3 Center of Gravity

9. **Angular Kinematics – Describing Angular Motion**

9.1 Angular position, displacement, velocity, and acceleration

9.2 Linear and angular quantities

9.3 Planes and axes for describing body and limb movements

10. **Angular Kinetics - Causing or Changing Angular Motion**

10.1 Angular inertia

10.2 Angular momentum, angular impulse

10.3 Newton's 3 laws applied to angular motion

11. **Fluids - Motion in Water and Air**

11.1 Buoyant force

11.2 Dynamic fluid forces

11.3 Drag

12. **Applications of Biomechanical Principles in Technique and Training**
