COURSE OBJECTIVE

Effective communication with others comes from a deep understanding of our selves and an empathic understanding of others, as well as knowing the skills and methods for dealing with interpersonal situations. In this course, the students will work at developing self-awareness, study the theory of interpersonal relationships, and practice specific skills in class and in their lives.

Intended Learning Outcomes

Upon completion of this course the student will be able to:

1. Identify key concepts describing interpersonal communication.
2. Describe basic principles and theories of communication.
3. Analyze personal life events using course vocabulary, concepts and theory.
4. Demonstrate active listening in sample interviews and observations.
5. Work collaboratively through the application of active listening skills and conflict resolution skills.
6. Describe, evaluate and demonstrate the components of empathy.
7. Differentiate between a person's (self or other) thoughts, feelings, and behaviours.

COURSE CONTENT: EXAMS, ASSIGNMENTS AND PROJECTS

Examinations: There will be 3 examinations in this course. They will be composed of short paragraph answer, fill in the blank, matching and multiple-choice questions. Each will be worth 20-25%. There is no comprehensive final exam. Your last unit exam will be written during the final exam period. There are no make-up exams. If you miss an exam you will write it during the final exam period. Students who miss a unit exam and choose to write it must sign their name on a form that will be distributed by the instructor during the final week(s) of the course.

Note: Students must not arrange to travel before the end of the final exam period.

In class assignments: Approximately once or twice a week/class a short exercise will be completed in class. The purpose of these assignments is to illustrate, (bring to life) an important skill or concept from the course. Preparation before and debriefing afterwards is an essential part of these assignments and as such they can only be completed in class. Assignments are located in the coursepack and can only be completed on these assignment sheets.

Projects/Papers:

Purpose: Experience the skills and ideas of the course

Length: 300- 350 words (please include a word count)

Submission: drop box in the class's D2L page by 4pm of due date

Late: penalized 5% per day. No work will be accepted 1 week following the due date.

Marks will be based on accuracy, completeness, and depth of reflection/analysis

For your analysis/reflection DO NOT simply record answers to the questions provided. They are there to stimulate your thinking.

1. Thinking skills Due Feb 10th

Select only one of the following three

- Perception check. Use one perception check in a normal everyday conversation. What did they say? What did you say (your perception check)? How well did it work? What would you do differently? How did it feel? What else did you learn?
- Perspective taking. Describe an issue that you and a significant other disagree on. Share your position on the issue, and then argue their side. Discuss the commonalities and differences you see. How has taking their perspective affected your thoughts and feelings?
- Alternate interpretation. Describe three lousy things that have happened in the last week. One at a time, indicate how you interpreted it negatively, how you could interpret them optimistically/positively, then how you could interpret them more realistically.

2. Communication skills Due Mar 9th

Select only one of the following three

- Paraphrase. In a normal everyday conversation use two paraphrases. What was the situation? What did you say (quote your paraphrases)? How well did it work? What would you do differently? How did it feel? What else did you learn?
- Request options. When listening to the problems/challenges of a family member/friend, instead of giving advice ask them to come up with options. What was the situation? What did you say (quote your request options statements)? How well did it work? What would you do differently? How did it feel? What else did you learn?
- I/we language: Use one clear/mature 'I language' and/or 'We' language statement in a normal everyday conversation. What was the situation? What did you say (quote your I/we language statement)? How well did it work? What would you do differently? How did it feel? What else did you learn?

3. Conversation skills Due April 13th
Select only one of the following two

- Meta communication. Sit down with a close family member or friend and ask if you can talk about how the two of you talk. Ask them to give you feedback on what they notice about the conversations you have and your communication style. Ask for specifics on verbal and nonverbal messages. What were the main observations? How well did it work? How did it feel? What did you learn?
- All skills/effective listening. With their permission, record a 10 minute conversation between yourself and a family member or friend. During the conversation use your minimal encouragers, perception checking, paraphrasing, and empathetic responses. Listen to the recording and select three of your substantive responses (not minimal encouragers). For each one write out exactly what your partner said before hand and then your response. Evaluate each of your responses. (could have improved it and/or how effective it was, how appropriate, etc.)

Practice questions: Students will be required to complete online practice questions on the course material. These are located on the D2I page for this course. They appear on an approximately weekly basis and are available for a limited number of days. It is the student's responsibility to check and complete these as they become available.
