This topic explores Canada's history of settlement. It provides an overview of native settlement, European colonization and early immigration. It sheds light on the challenges of national integration

Topic 4. Population

We examine population distribution patterns and demographic trends. Some of the themes are natural births, urbanization, contemporary immigration and ethnicity

Topic 5. Canada's economic geography

We analyze the nature of Canada's economy from a geographical perspective. We outline spatial patterns of resource production, industrialization, service production and trade
