Natural Hazards
Fall 2018

COURSE OUTLINE

The course description is online @ <http://camosun.ca/learn/calendar/current/web/geog.html>

This course will provide students with a first exposure to physical geography through the lens of natural hazards; that is, natural environmental processes that threaten human health and property. Topics will include natural and human systems that create hazards, earthquakes and related hazards, volcanoes, landslides and avalanches, coastal and river hazards, and weather- and climate-related hazards. Several lab exercises will introduce technical skills related to hazard assessment and mitigation. An emphasis on current events will be maintained. This course is intended for both science and non-science majors.

Ω Please note: This outline will not be kept indefinitely. It is recommended students keep this outline for their records, especially to assist in transfer credit to post-secondary institutions.

1. Describe the natural environmental processes that underlie natural hazards.
2. Explain how human development and planning influence natural hazard risk.
3. Use basic risk assessment and mitigation tools related to natural hazards.

4. Course Content and Schedule

- **Lectures:** Attendance is essential. I will post basic lecture outlines on D2L: online.camosun.ca. These outlines are no substitute for coming to class! Consult the course schedule for further details.
- **Readings** are an essential part of this course – they provide depth and context that are indispensable to your understanding of the course material, and they will be tested. Specific reading assignments are detailed below; these may be modified as the term goes on.
- **Assignments:** A variety of assignments must be completed for this class.
 - **Videos/Discussion/Field Trip:** Some class time may be devoted to video and discussions. To evaluate participation, you may be asked to hand in notes on the video and/or field trip at the end of class.
 - **Podcast and quizzes:** You will listen to Fault Lines, a CBC podcast that will outline emergency preparedness plans and procedures, interview various experts in the field and feature dramatic enactment of how this predicted natural disaster will impact British Columbians in the 24 hours, 72 hours, one month, one year following and beyond. You will complete a series of online quizzes to assess your learning from these podcasts.
 - **Lab Assignments:** Generally, there will be one lab assignment completed per lecture topic. Lab assignments will focus on applied learning in the area of physical geography, natural hazard assessment and mitigation. Please be prepared by bringing the following items to lab classes: ruler, calculator, pencil crayons or highlighters. The assignment due date will be at the beginning the subsequent lab period, unless otherwise instructed. A penalty of 10% per day will be imposed on late assignments. Late assignments will not be accepted after I have returned them marked. Anyone cheating or copying work will receive a mark of zero on the assignment.
- **Exams:** There will be two exams. The format for these will be a combination of multiple choice, short answer and long answer questions. They mainly will emphasize the lecture material, though lab material will also be drawn upon. The second exam will NOT be cumulative.
- **Illness, etc.:** If you miss a lab or exam due to illness or some other serious reason, I must ask you to provide a doctor's note or other documentation to support your case. Otherwise, a mark of zero for the missed assignment will be given. Exams and assignments are hard to reschedule, so try not to miss them unless you are too sick to perform at a normal level.

Students who miss an exam for a valid reason **must** contact me **within 24 hours** with an explanation. In such cases, one makeup exam time will be scheduled, and all students needing it will be expected to attend.

- **Course Schedule** (Provided first day of class)
- **Instructor Absence:** In the event of instructor absence, every effort will be taken to ensure a sustained quality of instruction. I will provide as much notice as possible, but please note that this is not always possible in the case of illness. Occasionally, administrative duties might require me to be absent from class. In these cases, as much notice as possible will be given and suitable alternatives to our regular class meeting will be presented to students ahead of time (i.e. pre-recorded lectures, invited speaker, or an on-line module).

5. Basis of Student Assessment (Weighting)

(a)	Labs	35%
(b)	Participation: Video, Field Trip, Lab Quizzes, Podcasts	15%
(c)	Exam 1	25%
(d)	Exam 2	25%
