Fall 2019

COURSE OUTLINE

The course description is online @ <http://camosun.ca/learn/calendar/current/web/geog.html>

Ω Please note: This outline will not be kept indefinitely. It is recommended students keep this outline for their records, especially to assist in transfer credit to post-secondary institutions.

1. Instructor Information

(a) Instructor	Hilary Sandford
(b) Office hours	Wednesday & Friday 11:30-12:30
(c) Location	Fisher 342C
(d) Phone	250-370-3393
(e) E-mail	sandford@camosun.ca

2. Intended Learning Outcomes

Upon completion of this course the student will be able to:

1. Describe the natural environmental processes that underlie natural hazards.
2. Explain how human development and planning influence natural hazard risk.
3. Use basic risk assessment and mitigation tools related to natural hazards.

3. Course Content and Schedule

Lectures: There will be two hours of lecture per week, usually on Tuesdays. The whiteboard will be heavily utilized and digital images will augment the traditional lecture style.

D2L: I use D2L, a learning support software, extensively in this course. It is a fairly user-friendly site that allows you to access lecture notes, electronic lab exercises, hand in your assignments digitally, track your mark, and be alerted to upcoming due dates or changes in assignments. I strongly encourage you to use this support site in this course.

Labs: Eleven lab exercises will be assigned during the term. These activities are designed to practically apply some of the tools of hazards assessment. Due dates will be one week from the date the lab is assigned, unless otherwise specified. Late assignments will not be accepted after I have returned the marked labs. Anyone cheating or copying work will receive a mark of zero on the assignment.

Event Timeline: In early November, I will ask you to provide an event summary for a natural disaster or catastrophe that has happened in the last century. You will prepare a well-written, tightly edited summary document of no more than two pages plus a well laid-out page of appropriate photos that will be displayed along an event timeline at the back of the classroom.

Podcast Quizzes: In 2017, CBC broadcast a series called Fault Lines, a radio documentary that specifically assesses Victoria’s risk of both shallow and deep earthquake events. It is a scary but excellent overview and is well worth your listening time. To ensure that you have listened to the five part series by the end of the term, there will be a sequence of brief quizzes on the material throughout the term.

Exams: There will be three tests throughout the term. The first will be on **Thursday, October 3rd**, the second will be on **Thursday, November 7th**, and the third will be during the Camosun College exam week. Do not make travel arrangements until the final exam schedule is posted to Camlink on October 18th.
