Ω Please note: This outline will not be kept indefinitely. It is recommended students keep this outline for their records, especially to assist in transfer credit to post-secondary institutions.

1. Instructor Information

(a) Instructor	Hilary Sandford		
(b) Office hours	M-Th 10:30-11:30		
(c) Location	Fisher 342C		
(d) Phone	370-3393	Alternative:

2. Intended Learning Outcomes

Upon completion of this course the student will be able to:

1. Analyze the natural environmental systems that underlie natural hazards.
2. Explain how human development and planning influence natural hazard risk.
3. Apply some basic geographic analysis techniques related to natural hazards.

3. Required Materials

Keller, E.A., R.H. Blodgett and J.J. Clague, 2015. Natural Hazards, 3rd Canadian Edition. Toronto: Pearson Education Canada, 488 pp. This textbook is entirely optional for this course.

4. Course Content and Schedule

Lectures: There will be two hours of lecture per week, usually on Tuesdays. The whiteboard will be heavily utilized and digital images will augment the traditional lecture style.

Labs: Ten lab exercises will be assigned during the term. These activities are designed to practically apply some of the tools of hazards assessment. Due dates will be one week from the date the lab is assigned, unless otherwise specified. Late assignments will not be accepted after I have returned the marked labs. Anyone cheating or copying work will receive a mark of zero on the assignment.

Event Timeline: In February, I will ask you to provide an event summary for a natural disaster or catastrophe that has happened in the last century. You will prepare a well-written, tightly edited summary document of no more than two pages plus a well laid-out page of appropriate photos that will be displayed along an event timeline at the back of the classroom.

Podcast Quizzes: In 2017, CBC broadcast a series called *Fault Lines*, a radio documentary that specifically assesses Victoria’s risk of both shallow and deep earthquake events. It is a scary but excellent overview and is well worth your listening time. To ensure that you have listened to the five part series by the end of the term, there will be a sequence of brief quizzes on the material throughout the term.

Exams: There will be three tests throughout the term. The first will be on **Thursday, February 6th**, the second will be on **Thursday, March 12th**, and the third will be on **Thursday, April 9th**.

7. Recommended Materials to Assist Students to Succeed Throughout the Course

D2L: I use D2L, a learning support software, extensively in this course. It is a fairly user-friendly site that allows you to access lecture notes, electronic lab exercises, hand in your assignments digitally, track your mark, and be alerted to upcoming due dates or changes in assignments. I strongly encourage you to use this support site in this course.

8. College Supports, Services and Policies
