### Basis of Student Assessment (Weighting)

**Assignments:** These will ask you to explore developmental theory and concepts in more depth. They will have you looking at multi-cultural perspectives, your own sources of influence for development, and research in varied educational practices, along with other options. There are 7 in total, and your top 6 scores will be worth 15% each for a total of 90% from assignments.

#### Discussion Topics:

**Discussion 1:** This must be completed prior to any assignments. You'll be asked to review a TED talk discussing procrastination with and without deadlines, and you'll be asked to read a document about what it means to practice academic honesty. Details about what to cover in your discussion will be posted in the discussion forum called "Discussion 1" (worth 2% of your final grade)

**Discussions 2 and 3:** Because this course covers physical, cognitive and social development from birth until death, there isn't a lot of opportunity to explore topics in a lot of depth. At the end of the modules there will be six additional learning units going into depth about a variety of topics in developmental psychology. Some of these will be generated in response to class interest, and others will be generated due to their importance. You will choose two of these topics, read them, and then post a discussion point on each, so that you can share opinions, resources and thoughts with peers. There will be two of these worth 4% each for a total of 8% from Discussions.

**Please Note: All material must be submitted by 11:59 PM December, 14<sup>th</sup> in order to count toward your final grade. Because this course is self-paced, there will be no exceptions.**
