CALENDAR DESCRIPTION

For both university and technology students, this course starts with atomic structure and periodic properties and leads to a discussion of chemical bonding, thermochemistry, molecular structure, intermolecular structure, colligative properties, intermolecular forces of attraction and their role in environmental issues. The experiments include chemical synthesis and analysis by titration and spectroscopy.

PREREQUISITE

One of:

C in Chemistry 12

C in Camosun Chem 090

C in Camosun Chem 110

COURSE LEARNING OUTCOMES / OBJECTIVES

Upon completion of this course the student will be able to:

1. Utilize nomenclature rules to name ionic and covalent compounds.
2. Demonstrate an understanding of stoichiometry by balancing chemical equations and performing mathematical calculations involving chemical reactions.
3. Describe the electronic structure of any atom in the periodic table and apply it to explain many of the physical and chemical properties of the elements.
4. Utilize simple bonding theories to explain why elements combine to form the compounds they do and also to explain many of the properties of compounds.
5. Apply knowledge of intermolecular interactions to rationalize many important physical properties of bulk matter in the gas, liquid and solid phases.
6. Use standard chemistry lab equipment, including burets, pipets, Buchner filters, and volumetric glassware in the correct manner.
7. Perform many standard laboratory procedures, such as titrations, preparation of standard solutions, the preparation, isolation, and purification of compounds, as well as use spectrophotometers to make analytical measurements.

COURSE GUIDELINES & EXPECTATIONS

1. Students must complete a minimum of 70% of the laboratory work to pass the laboratory component of Chem 120. **Students must pass the laboratory portion (>50%) of the course in order to obtain credit for Chem 120.**
2. A test score that is not as high as that of the December final exam will be dropped automatically and the weight redistributed to the final exam. For anyone who misses both tests, your final exam will then be 60% of the course grade.
3. Students must write each test as scheduled. No one is allowed to write late and there will be no exceptions. Early exam is a privilege and not a right, at full discretion of the instructor.
4. Safety glasses are mandatory! Students are responsible for bringing their own safety glasses. Failure to bring safety glasses will result in the student not being allowed to perform laboratory; no make-up lab will be allowed.
5. D2L assignments are mandatory.
