## COURSE GUIDELINES & EXPECTATIONS

---

The course content and additional schedule information is posted on D2L. Please consult the first module, Course Introduction, for full details. The course is broken in to 14 modules. Each week, there will be a topic

webpage that outlines the following for each module: learning outcomes, assigned readings and resources, learning activities and due dates. Each week, you will have either a lab or journal assignment, as well as a requirement to post and participate in the course discussion board.

There are two exams for the course. Both will be open-book, take home style exams with a time limit. The exams will be complete on D2L.

There is one paper due at the end of the course. The topic will be on a complex or “wicked” environmental program. Approach your topic by formulating a thesis based on the underlying research question, then carry out research to support your thesis. The paper will have the usual academic structure of introduction, discussion and conclusion. This is an opportunity to draw on course concepts; demonstrate your understanding by identifying and discussing relevant course concepts in your paper.

A penalty of 10% per day will be imposed on late assignments. Late assignments will not be accepted after they have been returned to other students with feedback.

Collaborating and supporting your peers is encouraged. Copying, plagiarism and/or cheating is not permitted. Please familiarize yourself with Camosun’s student conduct policies. This is also posted on D2L.
