COURSE LEARNING OUTCOMES / OBJECTIVES

Upon completion of this course a student will be able to:

1. Evaluate limits of functions. Using the limit definition, find derivatives of simple algebraic functions. Use derivatives to determine the slope of the tangent line to a curve, velocity, acceleration, and rates of change.
2. Use the power, product, quotient and chain rules to differentiate algebraic, trigonometric, logarithmic and exponential functions. Use implicit differentiation.
3. Find tangents and normals to given functions. Use Newton's Method to find an approximate solution to an equation. Solve problems involving related rates, curve sketching, maxima and minima, and parametrically defined curves. Find differentials, estimate errors, and linearize functions.
4. Find antiderivatives of functions and evaluate both indefinite and definite integrals. Use the trapezoidal rule and Simpson's Rule to approximate a definite integral.
5. Use integration to solve applications problems including the area between curves, volumes of solids of revolution, and centroids.
6. Calculate determinants of 2x2 and 3x3 matrices. Add, subtract and multiply matrices. Calculate the inverse of a matrix. Solve 2x2 and 3x3 linear systems using Gauss-Jordan elimination, augmented matrices and inverse matrices.

EVALUATION OF LEARNING

DESCRIPTION	WEIGHTING	
	(a) No Final Exam	(b) With Final Exam
Test 1	31%	15.5%
Test 2	25%	12.5%
Test 3	25%	12.5%
Test 4	19%	9.5%
Final Exam		50%
TOTAL	100%	

If your performance on each term test is at least 30%, you do not need to write the comprehensive final exam and your course grade can be determined 100% by your performances on the term tests using weighting (a); otherwise your course grade will be calculated using weighting (b).

Note:

- If you plan to use this course to fulfill the pre-requisite requirement for Math 193, you need to get 60% (letter grade C). Check the College Website for the most updated information.
- There is no makeup for missed test (except for documented medical reasons).
- Regardless of what your term mark is, you can opt in to write the comprehensive final examination (by signing up in the “Opt in” quiz in D2L – details to be released in D2L after test 4) and your course grade will then be calculated using weighting (b).
- Once you opt in writing the final examination, your course grade will be calculated using weighting (b), and you cannot go back to use 100% term work using weighting (a).
- You can get a better grade or a worse course grade depending on whether your performance in the final examination is better or worse than that in the term.

For instance:

	Term Tests	Final Exam	Course
Student 1	80% (A-)	Do Not Write	80% (A-)
Student 2	80% (A-)	(Opt in to write) 90%	85% (A)
Student 3	80% (A-)	(Opt in to write) 60%	70% (B-)
Student 4	55% (D)	(Opt in to write) 75%	65% (C+)
Student 5	55% (D)	(Opt in to write) 45%	50% (D)

If you have a concern about a grade you have received for an evaluation, please come and see me as soon as possible. Refer to the [Grade Review and Appeals](http://camosun.ca/about/policies/education-academic/e-1-programming-and-instruction/e-1.14.pdf) policy for more information.
