COURSE GUIDELINES & EXPECTATIONS

As noted above, in order to be successful in this course it is recommended that students read **course text** – I recommend the following strategy.

- Always read chapter summaries first – helps you orientate you to the most salient pieces of information prior to
- Survey: Scan chapter titles, subtitles, and chapter summary before reading the chapter
- Question: formulate questions from the textbook, partial lecture note, headings and subheadings.
 - Answer these as the chapter is read.
- Read: be sure to read theories and concepts to compare and contrast similarities and differences between concepts and theories/perspectives. An example, how does psychoanalytic theory compare to the cognitive social learning theory?
 - Keep your questions in mind and do not skip graphs, boxes, tables etc.
- Retrieve: prepare questions on the material than email questions or meet online in collaborate to discuss.
- Review: Create a summary covering all your questions and answers and list all the key terms and operationally define them. Read: the chapter a second time, for any missed detail in order to apply your conceptual understanding using examples in preparation for exams, assignment, and discussion posts.
