

CAMOSUN COLLEGE School of Health & Human Services Dental Programs

DHYG 170 Clinical Theory 1 Semester 1 – Fall 2012

COURSE OUTLINE

The Approved Course Description is available on the web @

http://camosun.ca/learn/calendar/current/web/dhyg.html

250-477-2662

 $\Omega\,$ Please note: This outline will not be kept indefinitely. It is recommended students keep this outline for their records.

1. Instructor Information

- (a) Instructor Bonnie Blank
- (b) Office hours Posted on door
- (c) Location Dental Building Rm 002
- (d) Phone

(e) E-mail blankb@camosun.bc.ca

(f) Website D2L is not used for postings

250-370-3192

2. Course Content and Schedule

a) This course introduces students to the theory and principles of dental hygiene practice including assessment, diagnosis, planning, implementation, and evaluation. Best practices in health and safety as they relate to the clinical environment are discussed.

Alternative:

b) i. Pre-requisites: N/A
 ii. Co-requisites: see below
 iii. Pre-Co-requisites: Bio 160, DHYG 110, DHYG 120, DHYG 145, DHYG 171

c) Course Particulars:

i. Credits: 4
ii. Components: Class hours 5
iii. Is the course available by distance education? No
iv. Is prior learning available for this course? No

Note: A weekly schedule of classes will be distributed as a separate document. Students are expected to be prepared for class by reading text chapters and completing related manual notes for each class as necessary.

3. Required Materials

a) Texts

Darby/Walsh, Dental Hygiene Theory and Practice, 3rd edition Nield-Gehrig, Fundamentals of Periodontal Instrumentation, 7th Edition Nield-Gehrig, Patient Assessment Tutorials, ^{2nd} edition Additional handouts/articles may be given throughout the Term

b) Other

Kilgore Model Camosun College 2012 Instrument Kit Camosun College Dental Hygiene Clinic Manual, 2012 Edition DHYG 170 Course manual will be available through the Camosun College Bookstore.

Each week will build on foundational knowledge acquired in the previous weeks so continue to review readings as you move through semester.

4. Intended Learning Outcomes

Learning Outcomes for DHYG 170 Clinical Theory 1	Program (Global) Outcomes (FYI)		
 Upon successful completion of this course a student will be able to: 1. Identify and describe professional dental hygiene practices, guidelines and standards as they relate to the clinical setting and practice. (A) 	 A. Function as a professional dental hygienist. B. Communicate and collaborate effectively with individuals, family, community and interdisciplinary teams. C. Demonstrate critical thinking and use evidence based decision-making to provide 		
 Identify and apply effective communication skills in all aspects of the learning environment (B) 	D. Advocate to improve oral health and access		
 Recognize and describe behaviours and processes that contribute to the delivery of safe, effective and efficient dental hygiene services in the clinical environment. (C,F,E) 	 to oral health services for individuals, families and community. E. Coordinate and contribute to the effective management of the practice environment to ensure quality care and services. 		
 Describe the fundamental concepts needed to perform dental hygiene assessment, care planning and evaluation processes in the clinical setting. (F) 	F. Function as a competent clinician using the dental hygiene process of care.G. Educate individuals, families and community about oral health including its relationship to		
 Determine the elements necessary to apply the fundamental instrumentation and self-care skills required in clinical practice (F) 	general health. H. Apply health promotion principles to improve the health of individuals, families and community.		

5. Course Elements and session numbers:

DHYG 170 Session Outcomes

Session 1: Introduction and Orientation to the Course

Upon completion of this session you need to be able to:

- 1. Explore the importance of critical thinking and problem-solving process in providing optimal dental hygiene care.
- 2. Explain the importance of establishing specific and realistic goals in all learning contexts.
- 3. Identify obvious problems that are blocking goal achievement, with guidance.
- 4. Plan basic strategies, considering some alternative solutions and their consequences, with guidance.
- 5. Identify limits of own learning.

Session 2: Infection Control

Upon completion of this session you need to be able to:

- 1. Describe theories of infection control including standard precautions.
- 2. Analyze routes of transmissions in oral health care settings.
- 3. Compare and contrast the benefits and limitations sterilizers that support oral health care.
- 4. Compare and contrast the benefits and limitations of disinfecting agents that support oral health care.
- 5. Explain strategies to reduce the risk of transmission of microbes including vaccinations for oral health care workers.
- 6. Explain post exposure protocols related to oral health care with a particular emphasis on Camosun College protocols.
- 7. Describe best practice standards in oral health care.

Session 3: Accident and Injury Prevention

- 1. Describe common accidents/injuries/ exposure to hazards that occur in the dental environment.
- 2. Explain methods of preventing accidents and injuries related to the dental environment.
- 3. Explain hazards dental personnel are exposed to and their control
- 4. Describe the program related to Workplace Hazardous Materials Information Sheets (WHMIS).
- 5. Explain your responsibilities with regard (WHMIS).
- 6. Explain the protocols in place for the reporting of accidents/injuries.

Session 4: Ergonomics

Upon completion of this session you need to be able to:

- 1. Explain principles of balanced positioning.
- 2. Describe the zones of activity for dental hygiene care.
- 3. Explain the steps in achieving balanced positioning.
- 4. Analyze risk factors and patterns for musculoskeletal symptoms (MSS).
- 5. Explain the role of surgical magnification in supporting the health of clinicians.

Session 5: Instrumentation – Basic Instrumentation Principles

Upon completion of this session you need to be able to:

- 1. Describe general characteristics of dental hygiene instruments.
- 2. Describe general principles of modified pen grasp, fulcrums and finger rests.
- 3. Explain basic principles of instrument insertion and activation of exploratory strokes including adaptation and angulation approaches.
- 4. Explain situation that require modifications in grasp, fulcrums and finger rests

Session 6 & 7: Instrumentation – Instrumentation Principles

Upon completion of this session you need to be able to:

- 1. Describe standard dental hygiene instruments and their use including mouth mirrors, explorers and probes.
- 2. Differentiate between curets and scalers.
- 3. Explain features of universal and area specific curets, and sickle scalers.
- 4. Explain basic principles of instrument insertion and activation for exploratory strokes and working strokes using curets and scalers.
- 5. Explain ways of organizing instruments for safe storage.

Session 8 & 9: Health History, Dental History and Vital Signs

- 1. Compare and contrast questionnaire and interview methods for obtaining health history information including limitations.
- 2. Explain conditions that require a "medical alert" to be placed.
- 3. Analyze how to approach achieving an accurate health history and dental history according to medico legal requirements.
- 4. Discuss rationale for obtaining vital signs for dental hygiene care.
- 5. Document findings according to Camosun College protocols

Session 10 (Term Test) & 11: Emergency Prevention and Management

Upon completion of this session you need to be able to:

- 1. Explain communication approaches to elicit client information in an efficient and caring manner.
- 2. Explain principles of a thorough health history and its application to the prevention of medical emergencies.
- 3. Explain the importance of comprehensive health information in the prevention of medical emergencies.
- 4. Apply strategies to elicit comprehensive health information in simulation experiences.
- 5. Explain the protocols of the Camosun College's Dental Clinic for obtaining trained emergency care personnel (PERT)
- 6. Identify the location of clinical emergency equipment in the clinical setting.

Session 12: Assessments—General Head and Neck Assessment (EO) and Intra-oral soft tissue examination

Upon completion of this session you need to be able to:

- 1. Apply knowledge of the structures and function of the head and neck in simulation exercises.
- 2. Explain how to develop a systematic method of assessing the head and neck and intraoral area.
- 3. Explain how to record significant deviations from normal utilizing terminology that meet medico legal requirements.
- 4. Examine communication approaches for sharing assessment data with the client.

Session 13: Implementation – Angulation and activation for deposit removal

- 1. Explain the significance of reviewing client's record and assessment data prior to debridement.
- 2. Analyze the limitations and strengths of curets and scalers in supporting periodontal debridement.
- 3. Explain the expected outcomes of non surgical pocket therapy and the influence of various risk factors.
- 4. Apply principles of a systematic, efficient, sequence for periodontal debridement, following basic instrumentation principles in simulation.
- 5. Explain clinical endpoints that illustrate a positive tissue response
- 6. Explore approaches to documentation of debridement procedures.

Session 14: Assessment –Dental and Occlusal examinations

Upon completion of this session you need to be able to:

- 1. Explain the characteristics of the dentition assessed during a dental examination.
- 2. Explain the purpose of assessing the dentition utilizing a systematic sequence.
- 3. Describe a systematic sequence for assessing the dentition.
- 4. Apply accurate documentation principles in recording dental findings in simulation.
- 5. Explore various aspects of occlusion.
- 6. Explain the purpose of recording Angles classification of occlusion.
- 7. Describe a systematic method for determining the classification of occlusion.
- 8. Describe the impact of occlusal trauma including subjective and objective observations.

Session 15 & 16: Periodontal assessment: (Risk assessment and MFR and CAL)

Upon completion of this session you need to be able to:

- 1. Explain aspects assessed during the periodontal examination.
- 2. Explain clinical manifestations associated with inflammation.
- 3. Explain descriptors commonly used to document periodontal assessments.
- 4. Apply accurate documentation principles in recording periodontal findings
- 5. Describe systematic sequences for assessing the periodontium and their importance to the quality of care.
- 6. Explain the AAP guidelines and how they support the periodontal diagnostic statement.

Session 17: Deposit Assessment:

- 1. Describe the concept of dental plaque biofilm and its formation
- 2. Relate the process of plaque biofilm mineralization to locations where calculus is frequently found.
- 3. Differentiate between soft and hard oral deposits with regard to etiology, significance and treatment.
- 4. Apply accurate documentation principles in recording findings.
- 5. Explain how the assessment of soft and hard deposits informs client education.
- 6. Describe the effectiveness of plaque and calculus inhibitors according to research

Session 18 & 19 & 20 & 21: Self care: Health promotion/disease prevention and aids:

Upon completion of this session you need to be able to:

- 1. Explain how the oral hygiene assessment is used for client education, monitoring, and motivation.
- 2. Analyze the concept of self care as it relates to general and oral health promotion.
- 3. Reflect on the role and limitations of the dental hygienist while promoting oral health for clients.
- 4. Explain the most common circumstances for recommending various dentitfrice, floss, toothbrushes and other self care aids that are compliant with the ADA Seal of Acceptance Program.
- 5. Explain how to modify client techniques when needed.
- 6. Explain approaches to support the documentation of changes in self-care effectiveness.
- 7. Explain how to record self care teaching and learning information in the clients' record.

Session 22 (Term Test #2) & 23: Concepts for instrument sharpening

Upon completion of this session you need to be able to:

- 1. Explain the importance of maintaining sharp blades for deposit removal.
- 2. Describe armamentaria to support sharp instruments.
- 3. Explain how to assess instrument sharpness
- 4. Explain and demonstrate the moving stone technique for sharpening instruments

Session 24: Dental Hygiene diagnosis:

- 1. Describe the evolution of the process of care with the inclusion of dental hygiene diagnosis.
- 2. Explain dental hygiene diagnostic approaches.
- 3. Differentiate between a dental hygiene diagnosis and a dental diagnosis.
- 4. Write dental hygiene diagnostic statements in simulation.
- 5. Formulate a client centered diagnosis in simulation.
- 6. Identify interventions that support various dental hygiene diagnosis

Session 25: Dental Hygiene care planning:

Upon completion of this session you need to be able to:

- 1. Explain the importance of the planning phase in the dental hygiene process of care.
- 2. Explain the clients' role in care plan development.
- 3. Analyze legal and professional responsibilities related to planning for dental hygiene care.
- 4. Compare and contrast a biomedical versus a human needs approach to diagnosis and treatment planning.
- 5. Explain how to relate the diagnostic statements to the care plan.
- 6. Explain how treatment priorities are determined.
- 7. Explain approaches to generating a client-centered care plan.
- 8. Analyze strategies for gaining and maintaining informed consent.
- 9. Calculate estimates and fees for dental hygiene services based on the Camosun fee guide.

Session 26 & 28: Evaluation of care:

Upon completion of this session you need to be able to:

- 1. Explain the purpose of the evaluation phase of client care and its significance to the process of care and practitioner liability.
- 2. Explain ways of measuring outcomes.
- 3. Explain factors influencing client goal achievement.
- 4. Apply Camosun College protocol for clients' evaluation phase in simulation scenarios.

Session 27: Introduction to Exan computer system in the reception area:

Upon completion of this session you need to be able to:

- 1. Explain processes for managing the clinical records to ensure optimal delivery of dental hygiene care.
- 2. Apply Exan Power Practice Software billing procedures to maintain accurate electronic records.
- 3. Print and identify client claim ledger and client routing slips for chart audit purposes.
- 4. Generate receipt and statement for client's record keeping.

6. Basis of Student Assessment (Weighting)

(a)	Assignments		
	Self-care assignment	20%	due Nov 9
	Self-evaluation reports	10%	(total of second and third self evaluation, the first is feedback only)
			The first report is due Sept 25 , the second report is due Oct.23 , And the third report is due Nov 27 .
	Exan Report	5%	TBA (end of term)

- (b) Exams Written term and final exams
 - 1. Term Test #1 20% due Oct 5th
 - 2. Term Test #2 15% due Nov 16th
 - 3. Final Exam 30% TBA
- (c) Other

7. Grading System

Note a C grade is required to pass this course

Standard Grading System (GPA)

Competency Based Grading System

A. **GRADING SYSTEMS** <u>http://camosun.ca/learn/calendar/current/pdf/academic-policies.pdf</u> The following two grading systems are used at Camosun College:

1. Standard Grading System (GPA)

Percentage	Grade	Description	Grade Point Equivalency
90-100	A+		9
85-89	А		8
80-84	A-		7
77-79	B+		6
73-76	В		5
70-72	B-	PASSING GRADE	4
65-69	C+	Minimum level has not been achieved.	3
60-64	С		2
50-59	D		1
0-49	F		0
	•	·	•

B. Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading scheme being used in the course. See Grading Policy at http://camosun.ca/learn/calendar/current/pdf/academic-policies.pdf for information on conversion to final grades, and for additional information on student record and transcript notations.

Temporary Grade	Description			
I	<i>Incomplete</i> : A temporary grade assigned when the requirements of a course have not yet been completed due to hardship or extenuating circumstances, such as illness or death in the family.			
IP	<i>In progress</i> : A temporary grade assigned for courses that are designed to have an anticipated enrollment that extends beyond one term. No more than two IP grades will be assigned for the same course.			
CW	<i>Compulsory Withdrawal:</i> A temporary grade assigned by a Dean when an instructor, after documenting the prescriptive strategies applied and consulting with peers, deems that a student is unsafe to self or others and must be removed from the lab, practicum, worksite, or field placement.			

8. Recommended Materials or Services to Assist Students to Succeed Throughout the Course

LEARNING SUPPORT AND SERVICES FOR STUDENTS

There are a variety of services available for students to assist them throughout their learning. This information is available in the College Calendar, Student Services or the College web site at http://www.camosun.bc.ca Also, refer to the resources for learning section of the DHYG student handbook.

STUDENT CONDUCT POLICY

There is a Student Conduct Policy. It is the student's responsibility to become familiar with the content of this policy. The policy is available in each School Administration Office, Registration, and on the College web site in the Policy Section.

http://camosun.ca/learn/calendar/current/pdf/academic-policies.pdf
