4. Course Content and Schedule

This course is delivered in a blended format with online and in-class components. Both aspects are equally valued and developed to enhance student learning. Learning formats in Mental Health & Addiction (MHA) Program courses will include discussions, presentations, peer interactions, student-directed research, and critical thinking activities.

It is expected that students arrive to class prepared to contribute their knowledge and insights, having completed pre-class expectations to create a positive learning environment. Because the MHA Program prepares graduates for professional roles in the community, students are expected to demonstrate positive interpersonal behavior in the classroom and online, including listening and acknowledging others, emotional maturity, respect, and effective teamwork.

Participation

Due to the short and intense nature of the MHA program, classes are planned as a continuum for building the skill and knowledge required to meet the competencies for working in community mental health & addiction services. Repeated absence from class will be discussed with the student and may jeopardize course completion if learning outcomes are not met. Students will be expected to complete learning activities to demonstrate outcomes for missed class content.

Evaluation of participation includes:

- Pre-class preparation, including reading assignment materials before class
- Arriving to class on time and consistent attendance
- Constructive and appropriate comments in class and online
- Active participation in group work, online submissions, and classroom activities
- Active and respectful listening and online dialogue
- Considerate behavior towards others in the classroom and online
