<http://camosun.ca/learn/calendar/current/web/nurs.html#NURS342>

This course provides opportunities for learners to build on their existing and emerging nursing knowledge using evidence-based practice guidelines and standardized procedures for advanced psychomotor nursing skills. An emphasis is placed on personal accountability and the role of vigilant assessment, monitoring, and documentation in preventing errors and minimizing the risk of harm to patients, drawing on the Quality and Safety Education in Nursing (QSEN) competencies. Learners will be challenged to anticipate the dynamic changes that frequently occur within a patient's situation. Learners will practice and demonstrate the required psychomotor skills, giving and receiving peer feedback.

Ω Please note: This outline will not be kept indefinitely. It is recommended students keep this outline for their records, especially to assist in transfer credit to post-secondary institutions.
