COURSE SCHEDULE, TOPICS, AND ASSOCIATED PREPARATION / ACTIVITY

During Semester II, students are assigned to a nursing practice group. The nursing practice experience will predominantly take place in a complex care facility. These facilities provide a higher level of care than independent living and are intended for clients who require 24-hour supervision (BC Ministry of Health, 2012). Students will engage in caring relationships with residents and possibly family members while providing personal care, bathing, nutritional assistance, and mobilizing their assigned resident(s). Throughout the semester, students will also be focusing on health assessments while integrating the concepts covered in the program to date. A faculty member will be present with the students at all times during practice hours in the complex care facility.

There may also be an opportunity for students to engage with school-aged children to teach the Sip Smart program. This interactive classroom-based program was developed to raise awareness among grades four, five, and six children of the negative health effects associated with the consumption of sugary, commercially prepared drinks. Nursing students will provide children with the knowledge and skills needed to make healthy drink choices. In addition, students may have an opportunity to practice in a Public Health setting with clients and families.

The six hours per week to Nursing 181 will include five hours in a complex care facility, elementary school, or public health unit and one hour for Praxis Seminar. The Praxis Seminar may take place in the practice setting or it may be held virtually. Details for nursing practice, seminars, Sip Smart and public health schedules/content will be provided by instructors during the orientation weeks (i.e. first two weeks of the term).

Students registered with the Centre for Accessible Learning (CAL) who complete quizzes, tests, and exams with academic accommodations have booking procedures and deadlines with CAL where advanced notice is required. Deadlines can be reviewed on the [CAL exams page](http://camosun.ca/services/accessible-learning/exams.html). <http://camosun.ca/services/accessible-learning/exams.html>

STUDENT EVALUATION

Assignments, due dates, and criteria for evaluation will be discussed during the first two weeks of the semester. All students are provided a Course Syllabus at the beginning of the term with student assessment information provided.

Assessments are based on the following:

1. Practice Appraisal Form (e-PAF)

Students are assessed based on their progress according to the learning outcomes and competencies listed under the standards outlined in the Nursing 181 package. Students collaborative with, and are formally evaluated by, their nursing practice instructor in a written format at mid-term and during the final exam week. Included in this process is a student self-evaluation of their progress and areas to work on.

Depending on your progress throughout each semester, you may be required to participate in more frequent evaluations. Decisions can be made to include written collaborative reports more frequently if it is deemed necessary by your instructor. A collaborative learning contract is completed for those students at risk for failure. All evaluations and collaborative reports will be written, dated, and signed by yourself and your instructor. These reports are kept on file in the nursing department.

2. Nursing Practice Critical Reflections

The intent of writing nursing practice critical reflections is to provide students with an opportunity to expand self-awareness and develop their critical thinking skills. Students will apply one of the reflective frameworks introduced in Nursing 160 to complete an in depth analysis of their practice experiences and to summarize the learning that will inform their future practice. At least three key course concepts from nursing theory courses will be integrated into each CR. Students must submit four or more CRs that meet the minimum criteria for reflective writing specified in the N181 CR marking rubric.

3. Learning Plan using SMART Goals

Students will bring forward their own learning plan to facilitate their learning goals developed in Nursing 110. Learning plans will reflect an evolving plan outlining how the student intends to address their learning outcomes over the semester.

Learning plans will be reviewed, revised as needed, and discussed a minimum of three times during the semester: during orientation, mid semester and at the end of the semester.

This course is graded by the [Competency Grading System](#).

If you have a concern about a grade you have received for an evaluation, please come and see me as soon as possible. Refer to the [Grade Review and Appeals](#) policy for more information.

COURSE GUIDELINES & EXPECTATIONS

Students are assessed based on their progress and level of independence according to the Learning Outcomes and the Practice Appraisal Form as per the BCCNM Standards. Students are formally evaluated by their nursing practice instructor in a written document at midterm and at the end of the semester. Students are required to provide written self-evaluations of their progress at those times.

Practice experiences within the curriculum are a vital part of learning.

Attendance is required in all practice courses. Practice experiences within the curriculum are a vital part of learning. Attendance is required in all practice courses. Once students are at the University of Victoria, i.e., Semester Six and beyond, they must complete the required minimum practice hours designated for each course.

Students are required to complete specific on-line orientation modules prior to entering nursing practice. If students have not completed these modules, they are not permitted to participate or attend in off-site nursing practice activities, putting them at risk to fail the course.

SCHOOL OR DEPARTMENTAL INFORMATION

Students are required to read and are accountable for following College policies and practicum guidelines as described in the BSN and HHS Student Handbooks.
