### **General Schedule**

The course will meet in-person, four times per week over a 14-week semester. Each week will consist of three one-hour lectures and one two-hour lab. Additional time over and above the allotted lab time may be required to complete lab assignments.

Lectures will be delivered in-person at regular times. Recordings of lectures may be made available. Labs will be assigned and then due before the next scheduled lab block.

Please see lecture and lab schedule at <http://my.camosun.ca> for detailed information about class hours and locations. Please consult the calendar tool in D2L frequently for any updates.

### **Topics**

Lectures will contain topics that will help you complete the weekly lab. These topics will teach you the basics of web development using HTML & CSS, as well as experience working with relational databases. Please see course schedule and topics table below for more detail.

### **Activities**

During lectures, you will have the opportunity to participate in in-class code practice. You will receive a participation mark, worth up to 5%, upon completion of the course, based upon the number of in-class examples you participate in. You will submit these up to your allocated course web space.

There will be weekly at-home open-book quizzes to reinforce your comprehension of course material covered during the week. You will have unlimited opportunities to complete each quiz before their weekly due date.

The instructor will be available, in person, during the regularly scheduled lab times. You will be required to demonstrate your previous week's assignment during the lab block. You will only receive a mark for the lab if you are able to demonstrate your lab to the instructor. You may be asked to make revisions if the lab does not meet sufficient guidelines.

There will be applied learning assignments that will function to assess your understanding of HTML and CSS and the Bootstrap CSS framework.

### **Expected Workload**

For highest results, you should expect to spend, outside of scheduled lecture and lab times, on average an additional 20-30 minutes daily (or 2-3 hours weekly) to complete lab assignments, practice examples, review material, and complete quizzes. During the two mid-term assignments, you should expect to invest a significant amount more time in order to achieve the highest of marks.

### **Evaluation**

You will be evaluated regularly through the at-home quizzes, and completion of the weekly labs. Building towards the final exam, you will complete the term projects which will further give you practice applying the

knowledge you acquire through the course. At the end of the course, you will complete a theoretical and practical exam.
